Project & Team Leadership for Emerging Leaders

Introduction

This Project & Team Leadership for Emerging Leaders course equips emerging professionals with the essential capabilities required to lead projects and manage teams effectively in dynamic organizational environments. It focuses on building strong foundations in leadership thinking, team coordination, and structured project execution. Participants will gain a clear understanding of how leadership influences project success and team performance. The program bridges the gap between technical execution and strategic leadership required in modern workplaces. It emphasizes practical leadership approaches that enhance decision-making, accountability, and collaboration. Ultimately, it prepares learners to transition confidently into leadership roles within project-driven environments.

Targeted Groups

This Project & Team Leadership for Emerging Leaders training targets professionals seeking knowledge and skills:

- New and emerging team leaders in organizations.
- Project coordinators moving into leadership roles.
- Junior managers seeking leadership development.
- Supervisors are responsible for small project teams.
- Professionals in operations and project support roles.
- Graduates entering leadership pathways in business.
- Employees are involved in cross-functional project work.
- Individuals preparing for project management responsibilities.

Course Objectives

Participants will achieve the following objectives by completing the Project & Team Leadership for Emerging Leaders course:

- Understand the core principles of project leadership and team dynamics in organizational contexts.
- Develop essential leadership skills to manage project teams effectively and improve productivity.
- Apply structured approaches to project planning, execution, and monitoring for successful outcomes.
- Strengthen communication skills to deliver clear direction, engage stakeholders, and resolve conflicts.
- Build confidence in decision-making under pressure within project environments.
- Enhance team motivation techniques to improve collaboration and performance results.
- Identify leadership styles and adapt them to different team situations and project needs.

Istanbul - Türkiye: +90 539 599 1206
Amman - Jordan: +962 79 712 3347

- Integrate strategic thinking into everyday project leadership responsibilities.

Targeted Competencies

Participants will gain the following competencies during the Project & Team Leadership for Emerging Leaders program:

- Ability to lead project teams with clarity and structured direction.
- Competence in applying project management leadership fundamentals.
- Skills in effective team leadership and performance management.
- Capability to manage communication across diverse stakeholders.
- Proficiency in solving team conflicts and improving collaboration.
- Understanding of leadership strategies for project success.
- Ability to align team tasks with project objectives efficiently.
- Confidence in supporting emerging leaders' development pathways.

Studying Scenarios

In this Project & Team Leadership for Emerging Leaders training, participants develop skills through the following scenarios:

- Managing a newly formed project team facing unclear roles and responsibilities.
- Leading a project under tight deadlines with limited resources and high expectations.
- Resolving communication breakdowns between team members and stakeholders.
- Supporting team motivation during project delays and performance challenges.
- Handling conflict between departments within a cross-functional project environment.
