Organizational Design, Workforce Planning & Job Evaluation (HAY Method) in the Healthcare Sector

Ref: 121213_1023026 **Date:** 25 – 29 July 2027 **Location:** Dubai (UAE) **Fees:** 4600 Euro

Introduction:

This Organizational Design, Workforce Planning, and Job Evaluation HAY Method in the Healthcare Sector course equips healthcare professionals with practical knowledge in hospital organizational design, workforce planning, and HAY-based job evaluation. Participants will explore modern hospital structures, optimize departmental efficiency, and align staffing strategies with patient care outcomes.

The Organizational Design, Workforce Planning, and Job Evaluation HAY Method in the Healthcare Sector program emphasizes hands-on workshops, competency mapping, and job grading. Case studies from HMC, Mayo Clinic, and Cleveland Clinic provide real-world context. Learners will develop career frameworks and fair compensation systems. Participants will integrate strategic HR planning with improvements in organizational performance.

Targeted Groups:

This Organizational Design, Workforce Planning, and Job Evaluation HAY Method in the Healthcare Sector training targets professionals seeking specialized knowledge and skills:

- Hospital administrators and managers.
- HR and workforce planning specialists.
- Clinical department leaders.
- Healthcare consultants.
- Nursing and allied health managers.
- Talent and performance management professionals.
- Policy makers in healthcare operations.

Course Objectives:

Participants will achieve the following objectives by completing the Organizational Design, Workforce Planning, and Job Evaluation HAY Method in the Healthcare Sector course:

- Understand modern hospital organizational models.
- Distinguish clinical vs. administrative functions.
- Optimize departmental structures and interdependencies.
- Apply workforce planning tools for clinical and support staff.
- Draft accurate job descriptions and competency frameworks.
- Conduct HAY-based job evaluations.
- Align compensation, grading, and career progression.
- Implement strategic HR planning to enhance hospital performance.
