Procurement KPIs

Ref: 121272_1025396 **Date:** 7 – 11 March 2027 **Location:** Amman (Jordan) **Fees:** 3300 Euro

Introduction

Procurement KPIs are essential for measuring the efficiency and effectiveness of procurement processes. This course provides a structured approach to understanding key performance indicators, their selection, and application in procurement strategies. Participants will learn to align KPIs with organizational goals, monitor supplier performance, and optimize cost management. The course also covers reporting techniques and performance benchmarking to enhance decision-making. Participants will be equipped to drive procurement excellence and achieve measurable improvements. This course is ideal for professionals seeking actionable insights into procurement performance metrics.

Targeted Groups

This Procurement KPIs course targets professionals seeking specialized knowledge and skills:

- Procurement managers and officers
- Supply chain coordinators
- Purchasing analysts
- Operations managers
- Strategic sourcing specialists
- Vendor relationship managers
- Financial analysts supporting procurement

Course Objectives

Participants will achieve the following objectives by the Procurement KPIs course:

- Understand the role of KPIs in procurement strategy
- Identify critical metrics for supplier performance
- Monitor cost savings and budget adherence
- Evaluate procurement cycle efficiency
- Benchmark performance against industry standards
- Implement data-driven decision-making
- Enhance supplier relationship management
- Improve procurement reporting techniques
- Align KPIs with organizational goals
- Develop actionable improvement plans

Dubai - UAE: +971 4 450 5697
Istanbul - Türkiye: +90 539 599 1206
Amman - Jordan: +962 79 712 3347

Targeted Competencies

Participants will gain the following competencies during the program:

- Selecting and defining relevant procurement KPIs
- Analyzing supplier performance data
- Tracking cost efficiency and savings
- Measuring procurement process effectiveness
- Reporting procurement metrics clearly
- Benchmarking against best practices
- Aligning KPIs with business objectives
- Applying KPI insights to optimize procurement strategies
- Improving vendor performance through data insights
- Making informed procurement decisions

Studying Scenarios

In this training, participants will develop their skills through the analysis of the following scenarios:

- Evaluating supplier delivery times and compliance
- Monitoring procurement cycle durations
- Assessing cost reduction initiatives
- Reviewing procurement budget adherence
- Analyzing supplier quality metrics
- Identifying gaps in procurement performance
- Applying KPI dashboards for real-time monitoring
- Developing strategies based on KPI trends

Course Content
