Advanced Stakeholder Management

Ref: 121731_1044703 **Date:** 25 – 29 July 2027 **Location:** Sharm El-Sheikh (Egypt) **Fees:** 4500 Euro

Introduction

This course focuses on building a structured understanding of stakeholder dynamics in modern organizations. It explores how stakeholder expectations influence strategic decisions and operational outcomes. Participants learn to identify, analyze, and effectively prioritize different stakeholder groups. The program strengthens communication approaches that support alignment and long-term engagement. It highlights practical models used in stakeholder relationship management and governance structures. It builds capability in managing complex stakeholder environments across sectors.

Targeted Groups

This Advanced Stakeholder Management training targets professionals seeking knowledge and skills:

- Project managers handling multi-stakeholder environments and delivery expectations
- Business analysts working on stakeholder requirements and engagement planning
- HR and organizational development teams are managing internal stakeholder relations
- Public sector professionals dealing with governance stakeholders and policy impact
- Consultants supporting client engagement and stakeholder mapping activities
- Program managers coordinating cross-functional stakeholder communication
- Team leaders responsible for stakeholder engagement and decision alignment

Course Objectives

Participants will achieve the following objectives by completing the Advanced Stakeholder Management course:

- Understand stakeholder identification methods and structured approaches to stakeholder analysis.
- Apply stakeholder mapping techniques to classify influence, interest, and impact levels.
- Develop stakeholder engagement plans aligned with organizational and project goals.
- Strengthen stakeholder communication strategy for clarity, trust, and consistency.
- Manage stakeholder expectations through structured reporting and feedback mechanisms.
- Improve stakeholder relationship management across internal and external groups.
- Align stakeholder needs with strategic planning and corporate governance requirements.
- Handle conflicts and resistance using practical stakeholder negotiation approaches.
- Integrate stakeholder engagement effectively into change management processes.
