Finance Business Partner Management Skills Excellence

Ref: 121818_1053019 **Date:** 3 – 7 May 2027 **Location:** London (UK) **Fees:** 5800 Euro

Introduction

The Finance Business Partner Management Skills Excellence course develops advanced capabilities for finance professionals who aim to become strategic partners in organizational decision-making. It explores the evolving role of finance business partners in connecting financial insights with business strategy, operational performance, and sustainable growth. Participants will gain knowledge of financial analysis, stakeholder management, performance improvement, and strategic communication techniques. The program focuses on enhancing the ability to translate financial data into meaningful recommendations that support leadership decisions. It examines approaches for building collaborative relationships between finance teams and business functions. Participants will understand how effective finance business partnering contributes to improved business performance, risk management, and long-term organizational value creation.

Targeted Groups

This Finance Business Partner Management Skills Excellence training targets professionals seeking knowledge and skills:

- Finance managers are improving strategic business support capabilities.
- Financial analysts are developing business partnership expertise.
- Accountants are expanding their advisory and communication skills.
- Budget professionals are enhancing their financial planning abilities.
- Business managers are strengthening their financial decision-making knowledge.
- Department leaders are collaborating with finance teams.
- Professionals preparing for strategic finance roles.
