ESG Reporting for Finance Professionals

Ref: 121821_1053171 **Date:** 29 November – 3 December 2026 **Location:** Cairo (Egypt) **Fees:** 3500 Euro

Introduction

The ESG Reporting for Finance Professionals course provides finance specialists with an understanding of environmental, social, and governance reporting practices. It explores the role of finance teams in integrating ESG information into financial decision-making, corporate reporting, and strategic planning. Participants will examine ESG frameworks, reporting requirements, sustainability metrics, and data management approaches that support transparent organizational performance. The program focuses on connecting sustainability objectives with financial analysis, risk management, and long-term business value creation. Participants will understand how ESG reporting influences investor confidence, regulatory alignment, and organizational accountability. It prepares finance professionals to contribute effectively to ESG reporting processes and sustainable business strategies.

Targeted Groups

This ESG Reporting for Finance Professionals training targets professionals seeking knowledge and skills:

- Finance managers manage ESG-related financial information.
- Accountants involved in sustainability reporting activities.
- Financial analysts evaluating ESG performance data.
- Auditors are reviewing sustainability disclosures and controls.
- Risk managers assessing ESG-related financial risks.
- Investment professionals analyzing sustainable business performance.
- Corporate reporting specialists are improving ESG communication.
- Business leaders are integrating ESG into financial strategies.

Course Objectives

Participants will achieve the following objectives by completing the ESG Reporting for Finance Professionals course:

- Understand the fundamentals of ESG reporting and its importance in modern finance.
- Identify key ESG principles affecting financial decision-making and reporting practices.
- Analyze sustainability data and connect ESG indicators with business performance.
- Recognize major ESG reporting frameworks and disclosure requirements.
- Evaluate environmental, social, and governance factors influencing financial risks.
- Develop knowledge of ESG metrics, measurement approaches, and reporting structures.
- Understand the role of finance teams in sustainability reporting processes.
- Apply ESG concepts to corporate financial planning and strategic analysis.
- Improve the ability to interpret ESG reports for investment and management decisions.
- Examine methods for enhancing transparency, accountability, and stakeholder communication.
- Support organizations in developing effective ESG reporting strategies.
- Strengthen financial professionals' understanding of sustainable value creation.

Targeted Competencies

Participants will gain the following competencies during the ESG Reporting for Finance Professionals program:

- Understanding ESG reporting principles and financial sustainability concepts.
- Evaluating ESG data for accurate business performance analysis.
- Interpreting sustainability disclosures and reporting frameworks.
- Linking ESG indicators with financial planning processes.
- Assessing environmental and social risks affecting organizations.
