Professional in Governance, Risk, and Compliance GRC Management

Ref: 15967_1055046 **Date:** 29 August – 2 September 2027 **Location:** Kuala Lumpur (Malaysia) **Fees:** 4600 Euro

Introduction

The Professional in Governance, Risk, and Compliance GRC Management course provides participants with an understanding of the principles and practices that support effective governance, risk management, and compliance within organizations. It examines how these three areas work together to strengthen organizational performance, accountability, transparency, and regulatory alignment. Participants will explore practical approaches for establishing governance structures, identifying organizational risks, and maintaining compliance with applicable laws, regulations, and internal policies.

The Professional in Governance, Risk, and Compliance GRC Management course focuses on integrating GRC practices into strategic planning and everyday business operations. Participants will develop the ability to evaluate risks, support informed decision-making, and contribute to effective compliance management. Through practical examples and real-world scenarios, the training prepares professionals to manage GRC responsibilities within dynamic organizational environments.

Targeted Groups

This Professional in Governance, Risk, and Compliance GRC Management training course is designed for:

- Risk management professionals seeking to strengthen their governance and compliance knowledge.
- Compliance officers responsible for monitoring regulatory and organizational requirements.
- Internal auditors seeking to enhance their governance and risk management capabilities.
- Legal and regulatory professionals involved in organizational compliance activities.
- Managers responsible for governance, risk, compliance, and organizational accountability.
- Business leaders seeking to align GRC practices with strategic objectives.
- Finance, operations, and IT professionals dealing with governance and risk challenges.
- Professionals preparing to develop careers in governance, risk, and compliance management.

Course Objectives

At the end of this Professional in Governance, Risk, and Compliance GRC Management course, participants will be able to:

- Explain the fundamental principles, structures, and objectives of governance, risk, and compliance management.
- Develop and evaluate governance frameworks that support organizational accountability, transparency, and effective decision-making.
- Identify, assess, prioritize, and monitor organizational risks using appropriate risk management approaches.
- Develop practical strategies to mitigate risks and strengthen organizational resilience.
- Interpret relevant legal, regulatory, and internal compliance requirements affecting business operations.
- Design and support effective compliance programs, monitoring activities, and corrective actions.
- Integrate governance, risk, and compliance processes across organizational functions and strategic activities.
- Strengthen ethical leadership, accountability, communication, and risk-aware decision-making throughout the organization.

Targeted Competencies

By the end of this Professional in Governance, Risk, and Compliance GRC Management program, participants will develop competencies in:

- Governance framework development and organizational accountability.
- Risk identification, assessment, prioritization, and mitigation.
- Compliance program planning, implementation, and monitoring.
- Interpretation of regulatory and internal policy requirements.
- GRC integration across business functions and processes.
- Strategic decision-making based on risk and compliance information.
- GRC communication, reporting, and stakeholder engagement.
- Ethical conduct, transparency, accountability, and continuous improvement.

Studying Scenarios

In this Professional in Governance, Risk, and Compliance GRC Management training, participants develop skills through the following scenarios:

- Evaluating governance weaknesses affecting organizational accountability and decision-making.
- Assessing operational and regulatory risks within business processes.
- Developing responses to identified compliance gaps and control weaknesses.
- Reviewing risk reports to support management decisions and priorities.
- Addressing ethical challenges and conflicts within organizational governance.
- Integrating GRC requirements into strategic planning and daily operations.
- Monitoring corrective actions following compliance or risk management findings.

Course Content

Unit 1: Foundations of Governance, Risk, and Compliance GRC Management

- Define the key concepts, principles, and objectives of governance, risk, and compliance.
