Emotional Intelligence for Enhancing Organizational Performance

Ref: 121872_1055726 **Date:** 14 – 18 June 2027 **Location:** London (UK) **Fees:** 5800 Euro

Introduction

This Emotional Intelligence for Enhancing Organizational Performance course examines emotional intelligence as a professional capability that influences communication, leadership, relationships, and organizational performance. It develops an understanding of emotional awareness, emotional regulation, empathy, motivation, and relationship management in workplace settings. Participants explore how emotions shape judgment, collaboration, conflict, resilience, and employee engagement. The program connects emotional intelligence skills with leadership effectiveness, team performance, workplace communication, and organizational culture. It addresses practical approaches for responding constructively to pressure, difficult conversations, interpersonal differences, and organizational change. Participants will understand how emotionally intelligent behaviors can support stronger relationships, sounder decisions, and more sustainable performance.

Targeted Groups

This Emotional Intelligence for Enhancing Organizational Performance training targets professionals seeking knowledge and skills:

- Managers seeking stronger emotional intelligence in the workplace.
- Team leaders improving communication, trust, collaboration, and performance.
- HR professionals supporting employee engagement and workplace relationships.
- Supervisors managing conflict, pressure, and difficult conversations.
- Executives strengthening leadership effectiveness and organizational performance.
- Professionals developing empathy, self-awareness, and emotional regulation.

Course Objectives

Participants will achieve the following objectives by completing the Emotional Intelligence for Enhancing Organizational Performance course:

Dubai - UAE: +971 4 450 5697
Istanbul - Türkiye: +90 539 599 1206
Amman - Jordan: +962 79 712 3347

- Explain core emotional intelligence concepts and their organizational relevance.
- Identify personal emotional triggers, patterns, strengths, and development needs.
- Apply self-awareness techniques to improve professional judgment and behavior.
- Demonstrate emotional regulation during pressure, uncertainty, and challenging interactions.
- Use empathy and active listening to understand colleagues and stakeholders.
- Apply emotional intelligence skills to workplace communication and relationship management.
- Analyze emotional factors affecting teamwork, engagement, motivation, and productivity.
