Strategic Risk and Security Management

Ref: 121898_1057136 **Date:** 11 – 15 January 2027 **Location:** London (UK) **Fees:** 5800 Euro

Introduction

The Strategic Risk and Security Management course develops an understanding of how organizations identify, evaluate, prioritize, and manage risks that can affect strategic objectives, assets, people, information, and operations. It examines the relationship between enterprise risk management, security management, governance, resilience, and strategic decision-making. Participants explore risk identification, risk assessment, threat analysis, vulnerability evaluation, risk treatment, and security planning within organizational contexts. The program addresses security governance, business continuity, crisis preparedness, incident management, and protection of critical assets and information. It emphasizes integrating risk intelligence with leadership decisions, organizational controls, and long-term business planning. Participants understand how coordinated risk and security practices can strengthen organizational resilience, protect value, and support sustainable performance.

Targeted Groups

This Strategic Risk and Security Management training targets professionals seeking knowledge and skills:

- Risk managers overseeing enterprise risk processes and controls.
- Security managers coordinating organizational protection and security planning.
- Compliance professionals evaluating regulatory and operational exposures.
- Internal auditors reviewing risk governance and control effectiveness.
- Business continuity professionals strengthening organizational resilience.
- Operations managers managing threats to people, assets, and processes.
- Senior leaders integrating risk information into strategic decisions.

Course Objectives

Participants will achieve the following objectives by completing the Strategic Risk and Security Management course:

Dubai - UAE: +971 4 450 5697
Istanbul - Türkiye: +90 539 599 1206
Amman - Jordan: +962 79 712 3347

- Explain strategic risk management principles and organizational risk categories.
- Distinguish threats, vulnerabilities, impacts, controls, and risk exposures.
