Health & Safety in the Workplace Training Conference

Ref: 8091_1059396 **Date:** 8 – 12 March 2027 **Location:** New York (USA) **Fees:** 7900 Euro

Introduction:

Health and safety in the workplace training is essential for those in managerial and supervisory roles. The workplace health and safety training conference ensures they have the knowledge and understanding to reduce incidents and enhance safety standards.

The importance of health and safety in the workplace cannot be underestimated due to its direct impact on reducing costs and increasing profits through effective safety management. This workplace health and safety training does not rely solely on health and safety technology and procedures.

Still, it emphasizes the need for personnel imbued with a deep understanding of potential loss-generating areas. This workplace health and safety training conference covers basic health and safety in the workplace; topics include Safety Management, fostering a robust Health and Safety Culture, understanding Workplace Equipment nuances, handling Hazardous Agents, and adhering to Legislation.

Targeted Groups:

- Process Managers.
- Process Engineers.
- Team Leaders/Supervisors.
- Maintenance Engineers.
- Health and Safety personnel.

Conference Objectives:

By the end of this health and safety in the workplace conference, participants will be able to:

- Provide advice on managing health and safety in the workplace.
- Determine health and safety training requirements for staff.
- Identify areas where legal requirements are specifically applicable.
- Establish good health and safety practices.
- Highlight areas for improvement through a risk assessment process.

Targeted Competencies:

Upon the end of this health and safety in the workplace conference, target competencies will:

Dubai - UAE: +971 4 450 5697
Istanbul - Türkiye: +90 539 599 1206
Amman - Jordan: +962 79 712 3347

- Health and Safety Management Systems.
- Safety Legislation.
- Health and Safety Culture.
- Control of Hazards Related to Work Equipment.
- Hazardous Agents Control.

Enhancing Health and Safety Practices in the Workplace:

Creating a workplace culture that values safety and health is integral for all organizations. Managers responsible for health and safety must understand how to promote and manage these aspects effectively. Human resources also play a vital role in reinforcing the importance of health and safety in the workplace, contributing to the overall well-being of employees.

Conference Content:

Unit 1: Legislation:

- Duties and Responsibilities within health and safety frameworks.
- Safety Law in the UK and EU - a definition and analysis.
- The role and powers of enforcing agencies ensure compliance.
- Consequences of non-compliance with the law.

Unit 2: Health and Safety Management:

- Key elements of a Safety Management system.
- Crafting and implementing a Health and Safety Policy.
- Establishing Safe Systems of Work.
- Conducting Inspections and Audits to ensure continuous improvement.

Unit 3: Safety Management and Culture:

- Investigating Accidents and Incidents and their implications on safety.
- Defining What is Health and Safety Culture.
- Strategies for developing a positive Safety Culture.
- Importance of Communication in Safety.
- The function and impact of Safety Committees.

Dubai - UAE: +971 4 450 5697
Istanbul - Türkiye: +90 539 599 1206
Amman - Jordan: +962 79 712 3347

Unit 4: Workplace and Work Equipment:

- Welfare arrangements as part of employee health and safety.
- Primary First Aid practices.
- Minimizing work equipment hazards.
- Electrical safety for a safer workplace.
- Planning and executing Emergency arrangements.

Unit 5: Hazardous Agents:

- Occupational Health and its prominence in the workplace.
- Control of Chemical Hazards.
- Managing Physical Hazards - encompassing Noise, Vibration, Radiation, and Manual Handling.
- Addressing Psychological Hazards such as Workplace Stress.

By embedding the principles of health and safety and sustainability in the workplace, organizations can significantly improve the health and safety culture and ensure a robust, secure, and productive environment for all employees.
