ISO 14001:2015 Transition Training: Environmental Management System

Ref: 9347_1061028 **Date:** 16 – 20 August 2027 **Location:** Zanzibar (Tanzania) **Fees:** 5300 Euro

Introduction:

This ISO 14001:2015 training EMS environmental management system course is designed for managers with environmental and sustainability responsibilities. It provides a clear path towards successfully achieving ISO 14001 Transition with any accredited certification body.

All new requirements from the 2015 standard revision will be considered, and participants will be empowered to return to their organizations and effectively implement the methodologies shared in the ISO 14001:2015 training EMS environmental management system course.

Participants will learn how the new ISO 14001:2015 standard supports the organization's strategic direction and how new ISO Clause requirements enhance the relevance of this management system. They will also consider environmental performance risks and opportunities and develop a more focused planning approach to achieving environmental objectives.

The 'leadership' clause will be considered to enable managers to engage with top executives within the organization and secure their 'buy-in' with key environmental initiatives. Performance evaluation will also be reviewed in-depth, enabling managers to evaluate the effectiveness of the environmental management system while simultaneously delivering continuous improvements.

Arrangements for reviewing organizational environmental compliance regulatory will be investigated, and participants in this ISO 14001:2015 training EMS environmental management system course will learn how to establish an effective compliance framework for the organization's benefit.

Targeted Groups:

- HSEQ Managers.
- Environment Managers.
- Quality Managers.
- Internal auditors within an organization are tasked with auditing various functions, including those linked to environmental compliance and performance.

Course Objectives:

By the end of this ISO 14001:2015 training EMS environmental management system course, the participants will be able to:

Dubai - UAE: +971 4 450 5697
Istanbul - Türkiye: +90 539 599 1206
Amman - Jordan: +962 79 712 3347

- Advise their organization's top management on how the new 14001 standards affect the organization.
- Demonstrate how to create a framework for managing organizational risks and opportunities.
- Implement a suitable framework for evaluating compliance and communicating compliance status outcomes.
- Demonstrate why document control in support of ISO14001 is important and implement an effective approach.
- Support the organization's strategic direction with effective environmental objectives and targets and ongoing environmental performance evaluation and improvement.

Targeted Competencies:

At the end of this ISO 14001:2015 training EMS environmental management system course, the target competencies will be able to evolve:

- 14001 EMS Environmental Management System.
- Communication Skills.
- Presentation Skills Verbal and Written.
- Information and Document Analysis/Interpretation.

What is ISO 14001:2015 EMS Environmental Management System Training?

In environmental sustainability, ISO 14001:2015 Training focuses on the Environmental Management System EMS. An EMS helps organizations manage environmental impacts through structured policies and practices. ISO 14001:2015 certification demonstrates a commitment to sustainability and regulatory compliance.

This ISO 14001:2015 training covers environmental policy, impact assessment, operational controls, and continual improvement. Certification in the EMS environmental management system enhances environmental stewardship and competitive advantage.
