MERCURY

HSE Leadership & Management Conference

Ref: 15744_1066116 **Date:** 27 September – 1 October 2027 **Location:** New York (USA) **Fees:** 7900 Euro

Introduction:

In today's highly competitive and challenging environment, having a proper perspective on your organization's direction is critical. This one-week HSE leadership and management conference will focus on issues and challenges faced in the construction industry in most industrial sectors and point you in the correct direction for protecting lives and property, protecting the environment for future generations, and avoiding the long arm of the law.

The HSE leadership and management conference is designed to stretch delegates and equip them with the knowledge and confidence to supervise, lead, and manage the health, safety, and environment of staff and contractors on a construction site in any industry, including oil and gas, manufacturing, chemical, pharmaceutical, new developments, and public infrastructure, including a fast-moving and complex business environment.

Understanding HSE Conference:

A vital component of this HSE leadership and management conference is understanding HSE training and its impact. HSE training includes delivering educational programs and information to employees about health, safety, and environmental management practices. Delegates will familiarize themselves with HSE management training concepts and practices and integrate them to ensure a comprehensive safety culture within their organization.

This HSE Leadership and Management conference is a key event focusing on enhancing HSE Health, Safety, and Environment leadership skills and management practices across industries. Attendees can gain valuable insights into HSE management training, including HSE safety training, and understand what HSE training is.

The conference highlights leadership in HSE, offering sessions on HSE leadership training, which develops transferable leadership skills crucial for promoting safety and compliance. Participants can also explore HSE certification opportunities, earning an HSE certificate to demonstrate their commitment to HSE excellence. This HSE conference provides a comprehensive platform for learning and sharing best practices in HSE management.

Leadership in HSE:

Developing leadership skills in HSE is pivotal for creating compliance and a culture that values safety and environmental stewardship. This HSE leadership and management conference will emphasize developing transferable leadership skills in HSE, enabling managers and supervisors to lead by example and fostering an atmosphere of continuous improvement in safety practices.

Dubai - UAE: +971 4 450 5697
Istanbul - Türkiye: +90 539 599 1206
Amman - Jordan: +962 79 712 3347

Upon completing this HSE leadership and management conference, participants will receive an HSE training certification, acknowledging their enhanced capabilities and understanding of HSE leadership strategies and principles underpinning it. This HSE certificate is a testament to the professional development undertaken to ensure health, safety, and environmental excellence in their respective fields.

Targeted Groups:

- HSE Managers from all industries.
- HSE Supervisors and Coordinators of construction projects irrespective of project size.
- All Technical Staff leading activities critical to safety excavation, electrical, mechanical, instrument, demolition, drilling, hand tools, water or swamp operations, lifting, working at height, and public service providers.
- HSE Systems Designers and HSE Team Leaders.
- Health Team Leaders and First-Aiders.
- Maintenance Staff.

Conference Objectives:

At the end of this HSE leadership and management conference, the participants will be able to:

- Understand the essential legislation and practices used to sustain HSE in the construction industry in an advanced democracy.
- Understand the vital skills, tools, concepts, and proven strategies required for the Construction of HSE.
- Apply the concepts, tools, lyrical techniques, and knowledge to improve HSE implementation in an organization.
- Understand the Employer and Employee roles and responsibilities in HSE Implementation.
- Transfer some learning into the organization, even in a poor legal framework.
- Understand and develop HSE systems based on Behavior to enhance the organization's HSE Culture.
- Improve organization culture via Behavioral HSE implementation.
- Provide some Tools required for continued monitoring of HSE on-site.

Targeted Competencies:

In this HSE leadership and management conference, the target competencies will be able to:

- Health and safety management systems.
- Safety legislation.
- Health and safety culture.
- Verbal and non-verbal communication.
- Plan, organize, and lead.
- Build rapport.
- Provide and receive feedback.

Dubai - UAE: +971 4 450 5697
Istanbul - Türkiye: +90 539 599 1206
Amman - Jordan: +962 79 712 3347

• Analyze and evaluate.

Conference Content:

Unit 1: Legislation and Management:

• Understand the health and safety at work Act 1974.
