Financial Forecasting and Preparation of Budgets and Financial Reports

Ref: 121276_1078763 **Date:** 19 – 23 July 2027 **Location:** Amsterdam (Netherlands) **Fees:** 5600 Euro

Introduction

This course equips participants with advanced skills in financial forecasting, budgeting, and report preparation to guide strategic decision-making. It covers techniques for projecting revenues and expenses, preparing realistic budgets, and producing accurate financial reports. Learners will understand how to link forecasts with operational plans and report performance effectively. The course highlights best practices in variance analysis, cash-flow planning, and financial reporting. It also addresses regulatory and internal reporting requirements. By completing this course, professionals will be able to support their organization's financial planning with confidence and clarity.

Targeted Groups

This Financial Forecasting and Preparation of Budgets and Financial Reports course targets professionals seeking specialized knowledge and skills:

- Financial analysts working in corporate planning.
- Budget managers in non-profit or public sector organizations.
- Accountants preparing internal or external financial reports.
- Business owners or entrepreneurs managing growth and cash needs.
- Controllers and CFOs are involved in long-term financial strategy.
- Project managers oversee cost forecasting and resource allocation.

Course Objectives

Participants will achieve the following objectives by Financial Forecasting and Preparation of Budgets and Financial Reports:

- Build accurate financial forecasts using quantitative methods and scenario modeling.
- Design detailed annual and rolling budgets aligned with organizational goals.
- Develop cash-flow projections that support sustainable operations.
- Prepare formal financial reports in accordance with standard frameworks.
- Analyze variances between forecasts, budgets, and actuals.
- Use forecasting and reporting to inform strategic decisions and performance reviews.

Targeted Competencies

Participants will gain the following competencies during the program:

Dubai - UAE: +971 4 450 5697
Istanbul - Türkiye: +90 539 599 1206
Amman - Jordan: +962 79 712 3347

- Strategic thinking in predicting future revenue and expense trends.
- Technical proficiency in budget construction and forecasting tools.
- Analytical insight to interpret financial variances and report findings.
- Communication skills to present budget and report summaries clearly to stakeholders.
- Problem-solving skills to adjust forecasts and budgets when business conditions change.
- Decision-making capacity based on robust financial models and reports.

Studying Scenarios

In this training, participants will develop their skills through the analysis of the following scenarios:

- A manufacturing company is projecting sales and cost forecasts for the next fiscal year under multiple economic scenarios.
- A non-profit organization building a donor-funded program budget and cash-flow forecast.
- Startup founder estimating revenue growth and cash burn while preparing monthly financial reports.
- A corporate finance team compares budgeted and actual performance, conducts variance analysis, and updates forecasts accordingly.
