Financial Planning & Analysis FP&A Course

Ref: 121914_1078966 **Date:** 23 – 27 August 2027 **Location:** Barcelona (Spain) **Fees:** 5600 Euro

Introduction

The Financial Planning & Analysis FP&A course connects financial information with business strategy, operational performance, and management decision-making. It develops an understanding of budgeting, forecasting, financial modeling, variance analysis, performance management, and strategic financial planning. Participants examine how FP&A professionals transform historical and operational data into forward-looking financial insights that support organizational growth and resource allocation. The program addresses driver-based planning, rolling forecasts, scenario analysis, management reporting, and financial storytelling as core components of modern FP&A practice. It emphasizes interpreting financial performance, identifying business drivers, evaluating risks and opportunities, and communicating meaningful conclusions to decision-makers. Participants will support stronger financial control, business performance, and strategic decision-making.

Targeted Groups

This Financial Planning & Analysis FP&A training targets professionals seeking knowledge and skills:

- Finance managers responsible for planning and performance analysis.
- FP&A analysts developing budgeting and forecasting expertise.
- Accountants supporting management reporting and financial planning.
- Controllers evaluating financial performance and cost movements.
- Financial analysts interpreting business and financial data.
- CFO office professionals supporting strategic financial decisions.
- Business managers involved in budgets and resource allocation.
- Professionals transitioning into FP&A and corporate finance roles.

Course Objectives

Participants will achieve the following objectives by completing the Financial Planning & Analysis FP&A course:

Dubai - UAE: +971 4 450 5697
Istanbul - Türkiye: +90 539 599 1206
Amman - Jordan: +962 79 712 3347

- Explain the strategic role and core responsibilities of FP&A functions.
- Analyze financial statements to identify performance trends and business drivers.
- Develop structured budgets aligned with organizational objectives and operating plans.
- Apply financial forecasting techniques to estimate future business performance.
- Construct driver-based forecasts using relevant operational and financial assumptions.
- Evaluate actual results against budgets, forecasts, and prior-period performance.
- Analyze revenue, cost, profitability, and cash-flow variances systematically.
- Apply rolling forecasts to improve planning responsiveness and decision quality.
- Develop scenario models for evaluating risks, opportunities, and strategic alternatives.
- Interpret financial KPIs and management performance indicators.
- Assess the financial impact of changing business assumptions and market conditions.
- Prepare concise management reports that highlight significant financial movements.
- Connect financial analysis with operational performance and strategic priorities.
- Evaluate resource allocation decisions using financial and business evidence.
- Communicate financial insights clearly to executives and business stakeholders.
- Support evidence-based decisions through structured financial planning and analysis.

Targeted Competencies

Participants will gain the following competencies during the Financial Planning & Analysis FP&A program:

- Financial planning and budgeting expertise.
- Forecasting and rolling forecast capabilities.
- Driver-based financial modeling skills.
- Budget-versus-actual variance analysis.
- Revenue and cost performance analysis.
- Financial KPI interpretation.
- Scenario and sensitivity analysis.
- Cash-flow forecasting capabilities.
- Management reporting proficiency.
- Strategic financial analysis.
- Business partnering and stakeholder communication.
- Financial storytelling and executive insight development.
- Critical evaluation of financial assumptions.
- Performance management and decision-support capabilities.

Real-world Case Studies

In this Financial Planning & Analysis FP&A training, participants develop skills through the following cases:

- Analyze a company facing revenue shortfalls and identify the financial and operational drivers behind the unfavorable variance.
- Evaluate a rolling forecast after changing demand, pricing, and cost assumptions.
- Assess alternative investment and resource-allocation scenarios using financial projections.
- Interpret management performance reports and develop concise recommendations for improving profitability, cash flow, and operating efficiency.
