MERCURY

Strategic AI Governance and Policy Development

Ref: 18_1080404 **Date:** 29 August – 2 September 2027 **Location:** Sharm El-Sheikh (Egypt) **Fees:** 5500 Euro

Course Overview

Artificial intelligence is reshaping how organizations and governments make strategic decisions, develop policy and drive innovation. This course equips executives, policymakers and senior professionals to lead AI-driven transformation by aligning AI initiatives with organizational objectives while ensuring responsible governance, regulatory compliance and ethical use.

Course Objectives

- Assess how AI affects organizational leadership, strategy and decision-making
- Understand regulatory frameworks, ethical considerations and responsible AI practices
- Identify AI opportunities and align AI initiatives with organizational goals
- Recognize AI-related risks and manage them responsibly
- Guide AI adoption and support AI-driven innovation

Who Should Attend

- CIOs and CTOs
- Digital transformation managers
- AI strategy managers
- Risk and compliance managers
- Innovation managers
