Introduction:

Self-mastery is not achieved by accident - it is a process that occurs as we interact effectively with the events and circumstances of our lives. Each moment of our lives allows us to practice self-mastery by expanding our visions, awakening the faculties of our minds and hearts, and assuming full responsibility for living, growing, and contributing. As we master our emotions, we can enhance our ability to lead others, acting as a role model and someone others truly wish to follow.

Through this leadership engagement and development program, you will learn a great deal about yourself - how you think, how you perceive the world and how others perceive you, how you communicate, and how you can enrich your communication skills - and through that process, you will learn how to lead others with great skill.
