Facilities Management Training Conference

Ref: 16235_1081499 **Date:** 1 – 5 November 2027 **Location:** Casablanca (Morocco) **Fees:** 4500 Euro

Introduction:

The Facilities Management training conference provides a platform for professionals to explore the latest trends, technologies, and strategies in facility management, encompassing both theoretical frameworks and practical applications. This event highlights the crucial role of facility management in achieving organizational efficiency and sustainability.

As facilities continue to evolve with integrated technologies and regulatory requirements, the demand for skilled facility managers has grown significantly. This Facilities Management training conference emphasizes the strategic alignment of facility services with business goals, operational excellence, and cost-effective solutions.

Attendees will engage with the latest practices in preventive maintenance, outsourcing, contract governance, and performance benchmarking. Health, safety, and environmental compliance are explored as essential pillars in managing workplace risks. This Facilities Management conference is for professionals dedicated to enhancing their skills in facility management.

Targeted Groups:

This Facilities Management training targets professionals seeking specialized knowledge and skills:

- Facility managers seeking performance improvement strategies.
- Maintenance engineers are responsible for asset care.
- Real estate and property managers.
- Health, Safety, and Environment Officers.
- Engineers involved in infrastructure or utilities.
- Procurement and contract managers.
- Operations and logistics supervisors.
- Workplace and corporate services managers.
- Sustainability and compliance officers.
- Technical consultants and project managers.

Targeted Competencies:

Participants will gain the following competencies during the Facilities Management program:

Dubai - UAE: +971 4 450 5697
Istanbul - Türkiye: +90 539 599 1206
Amman - Jordan: +962 79 712 3347

- Strategic planning and execution in facilities management.
- Maintenance scheduling and asset lifecycle optimization.
- Outsourcing negotiation and contract monitoring.
- Performance analysis using KPIs and data analytics.
- Health and environmental compliance in facilities.
- Emergency response and hazard risk assessment.
- Technology integration and digital systems literacy.
- Sustainability and energy efficiency practices.
- Cross-functional stakeholder communication.
- Continuous improvement and benchmarking application.

Conference Objectives:

Participants will achieve the following objectives by completing the Facilities Management conference:

- Define the scope and strategic impact of facilities management.
- Describe key responsibilities and functions within modern facilities.
- Analyze preventive maintenance systems and apply risk-based approaches to optimize maintenance.
- Design customized maintenance schedules based on the criticality of each asset.
- Evaluate outsourcing strategies and develop contract frameworks to maximize efficiency and effectiveness.
- Compare in-house and outsourced service models effectively.
- Formulate performance metrics for monitoring facility operations.
- Assess performance data to identify operational gaps and areas for improvement.
- Align KPIs with organizational efficiency goals.
- Demonstrate understanding of environmental and safety regulations.
- Implement emergency response and safety plans for workplaces.
- Promote sustainability practices within facility operations.
- Engage stakeholders through accurate performance reporting.
- Integrate smart systems and digital tools into facility workflows.
- Enhance strategic decision-making in facility management practices.
