About This Course

Senior organizational leaders often face misaligned priorities, fractured stakeholder relationships, and complex ethical dilemmas. To succeed in this course, you should already direct cross-functional teams and oversee department resource allocations. You practice by auditing operational integrity risks, reframing stakeholder friction through diagnostic emotional intelligence models, and resolving strategic trade-offs using divergent inquiry tools.

Who It Is For

- Operational directors responsible for navigating cross-department negotiations and resource commitments
- Governance committee leads responsible for maintaining institutional ethics and oversight frameworks

This course is not for newly appointed front-line supervisors seeking basic delegation tutorials, who are better served by an introductory supervisory essentials course, nor for enterprise board members seeking statutory fiduciary compliance reviews, who are better served by a board governance regulatory course.
