Safety Culture Assessment (Audit-Gap Analysis)

Ref: 15736_1084644 **Date:** 26 – 30 September 2027 **Location:** Istanbul (Turkey) **Fees:** 4900 Euro

Introduction:

A strong safety culture is essential for the success of any organization, particularly in high-risk industries. The Safety Culture Assessment, through audit and gap analysis, is a critical tool for evaluating an organization's safety practices, identifying gaps between existing procedures and industry standards, and uncovering areas for improvement. This assessment process enables organizations to measure their current safety culture and develop actionable strategies to foster a safer working environment, reduce incidents, and enhance compliance with regulatory requirements. Through continuous evaluation, the Safety Culture Assessment ensures that safety remains integral to organizational operations.

The Safety Culture Assessment Audit-Gap Analysis course focuses on developing a strong safety culture within organizations. This training equips participants with the tools to assess and improve workplace safety culture through effective safety culture assessments, gap analysis, and tailored surveys. They will gain insights into what a safety culture is, its importance, and how to utilize safety culture assessment tools like checklists and surveys to measure performance.

The Safety Culture Assessment Audit-Gap Analysis training emphasizes the evolution of safety culture, its benefits, and the role of process safety assessments in establishing and enhancing safety practices. By conducting a skills audit gap analysis, organizations can identify areas for improvement and implement strategies to foster a robust and effective safety culture. It is ideal for those seeking to improve safety practices, create an environment where safety is a core value, and understand the steps to implementing and sustaining a safety culture.

Targeted Groups:

- Safety Managers and Coordinators.
- Health and Safety Officers.
- Risk Management Professionals.
- Operations Managers.
- Compliance Officers.
- Human Resources Personnel.
- Supervisors and Team Leaders.
- Auditors and Internal Review Staff.
- Senior Management and Executives.
