MERCURY

Effective Modern Security Management and Operations Course

Ref: 1163_250898 **Date:** 15 – 19 August 2027 **Location:** Manama (Bahrain) **Fees:** 4900 Euro

Introduction

This modern security management and operations training program is designed to give participants a deep dive into the fundamentals of managing advanced security operations.

With an emphasis on courses on security and risk management, the curriculum is broad-ranging, covering topics such as establishing and upholding security policies and procedures, enhancing risk management strategies, managing access controls with precision, and employing investigative techniques—all strategically integrated to bolster participant comprehension of advanced security management concepts.

Participants in this advanced security management and operations course will be allowed to explore the practical application of security risk management, which employs the foundations of risk management to handle security threats efficiently.

In this security management and operations course, participants will learn to identify potential threats, evaluate the effectiveness of standing controls, assess the risks' impacts, prioritize them based on likelihood and impact, and respond appropriately.

The comprehensive security operations management course equips participants with the knowledge to manage daily operational activities adeptly, keeping pace with ongoing regulatory developments. It also prepares participants to implement security measures that align with dynamic security demands.

Targeted Groups

- Experienced or non-experienced security managers.
- Civilian representatives.
- Managers.
- Supervisors
- Risk management staff.

Course Objectives

Upon completing this advanced security management course, participants will be able to:

Dubai - UAE: +971 4 450 5697
Istanbul - Türkiye: +90 539 599 1206
Amman - Jordan: +962 79 712 3347

- Apply foundational management concepts to security and elucidate the specialized role of the security manager.
- Planned, developed, and managed human and material resources to operate a security unit effectively.
- Provide guidance on developing security programs and standard operating procedures SOPs.
- Oversee and enforce the implementation of security programs and SOPs.
- Ensure that security personnel are proficient in implementing preventive security measures.
- Offer consultative advice on developing emergency plans and managing necessary security responses during security emergencies in various facilities.

Targeted Competencies

- Developing the skill set to respond effectively to security incidents.
- Interpreting the latest international regulatory requirements.
- Elevating professionalism within facilities through the development and implementation of effective procedures.
- Identifying and managing security risks efficiently.
- Crafting Risk Matrices and determining the potential consequences of various events.

Course Content
