Unit 7: Understanding Learning Styles and Overcoming Learning Barriers

- Analyzing learning styles.
- Economical learning style assessment - practical demonstration.
- Evaluating the impact of personality on training outcomes.
- Strategies for addressing learning difficulties.
- Optimal timing for effective learning.
- The crucial role of retention in memory.
- Motivational factors in learning: innovative approaches.

Unit 8: Specifying and Constructing Training Effectively

- Understanding the significance of learning outcome objectives.
- Crafting effective learning outcome objectives.
- Essential documents for every training course.
- Maximizing the impact of visual aids and supplementary materials.
- Calculating required room and screen sizes accurately.
- Sound's contribution to enhanced learning.
- Leveraging training videos for specific learning outcomes - illustrated with examples.
- Effective use of clipped video sequences - demonstrated instances.

Unit 9: Training Analysis - Key Areas of Measurement

- Monitoring budget expenditure and cost control.
- Generating value from training.
- Establishing competency standards and measuring progress.
- Relating performance to competency: A crucial connection.
- Measuring post-training improvements.
- Equating competence with performance for enhanced productivity.
- Implementing competence and performance measurement software.

Unit 10: Measuring and Reporting Training Results

- Utilizing formulas for value enhancement and calculating unit costs.
- Maximizing the impact of training activities while maintaining control.
- The evolving leadership role of training departments.
- Adapting to uncertainty during training processes.
- Showcasing training success through engaging case studies.
- Debating the concept of training functions as profit centers.
- The role of end-of-course questionnaires: purpose and implementation.
- Application of learning to the workplace.
