Managing and Combating Security Risks and Crises Program

Ref: 15104_260452 **Date:** 25 – 29 January 2027 **Location:** London (UK) **Fees:** 5800 Euro

Introduction:

Security risk management is a critical process that involves identifying, analyzing, and mitigating risks to ensure the safety and stability of organizations. This security risk management techniques and strategies course will equip participants with the necessary skills and techniques for effective security risk management.

In the dynamic industrial investment environment, organizations are more susceptible than ever to myriad threats that pose significant security risks. Given intense competition and uncertainty, anticipating potential crises and disasters is crucial.

Developing a robust security risk management program necessitates meticulous planning, forming a specialized crisis and disaster management unit, and ensuring the team is well-trained to handle emergencies. A crisis can critically impact an institution both physically and morally.

Conversely, a disaster signifies an event resulting in extensive losses and may stem from natural or man-made causes. Recognizing the importance of security risk management means adopting strategies that prevent potential crises from escalating into disasters.

Targeted Groups:

- Security Managers.
- Enterprise Security Officials.
- Crisis Management Teams.
- Scenario Preparation Teams.
- Emergency Teams.
- Individuals interested in crisis management seek skill and experience development.

Course Objectives:

Upon the end of this security risk management course, participants will:

Dubai - UAE: +971 4 450 5697
Istanbul - Türkiye: +90 539 599 1206
Amman - Jordan: +962 79 712 3347

- Grasp contemporary management concepts and the challenges in the administrative environment.
- Understand factors, causes, and stages leading to crises.
