Security Management, Planning & Asset Protection Conference

Ref: 8253_263853 **Date:** 21 – 25 February 2027 **Location:** Kuala Lumpur (Malaysia) **Fees:** 4600 Euro

Introduction:

Security management, planning, and asset protection are critical for any leading business's growth and development. Effective security management, well-trained personnel, and systems should integrate seamlessly to protect key assets without hindering business operations.

The development of companies brings along a range of risks and threats, originating internally, such as through Personnel and IT Systems, and externally from natural disasters or terrorist activities. Not all threats are within the direct control of security management, but successful security management ensures identification, risk evaluation, and implementation of adequate safeguards for company assets. These include Crisis Management Planning and Business Continuity Plans.

Risk Analysis and Security Surveys are indispensable tools for security and management professionals. They provide an objective means to identify and quantify risks at various levels. By offering evidence-based assessments, these tools facilitate gaining executive support.

This security management, planning, and asset protection conference aims to equip delegates with industry best practices in risk assessment, asset identification, vulnerability assessments, and protective measure documentation to mitigate risks and liabilities.

In contemporary business settings, it's essential to realize that security departments and personnel are integral to the corporate structure. Security professionals must be capable of managing and leading teams to develop and implement security plans that align with corporate objectives. They must also be informed of industry needs, team dynamics, and the specifics of security projects.

This security management, planning, and asset protection conference is designed to provide participants with specialized knowledge in security planning and asset protection, enabling them to perform their Management and supervisory roles to international standards.
