Developing an Effective Safety Culture Training Course

Ref: 7031_271699 **Date:** 19 – 23 September 2027 **Location:** Dubai (UAE) **Fees:** 4600 Euro

Introduction to Developing a Safety Culture:

An effective safety culture is widely accepted as essential to successfully developing and implementing an organization's safety management system. This Developing an Effective Safety Culture and Leadership course prevents significant accidents. It ensures that everyone, regardless of position, follows safety procedures and safe practices, constantly intervening when unsafe behaviors or conditions are observed. A safety culture improvement process approach that actively engages everyone through personal responsibility fosters safety culture development and promotes effective safety culture leadership.

Developing an effective safety culture and leadership approach by integrating safety culture leadership training throughout this Developing an Effective Safety Culture course, leaders and managers will learn how to embody the principles of cultural safety training. Participants will discover how to spearhead initiatives to develop a safety culture in the workplace, ultimately consolidating an influential safety culture that supports a comprehensive and robust safety management system.

Targeted Groups:

- All Line Managers and Supervisors.
- Production and Process Engineers.
- Maintenance Personnel.
- HSE Personnel.
- Human Resources Professionals.
- This Developing an Effective Safety Culture course is for any other personnel involved in planning and implementing the organization's HSE management system.

Course Objectives:

At the end of this Developing an Effective Safety Culture training course, the participants will:

- Understand the human factors and their application to their organization's safety and cultural status.
- Learn how to be familiar with elements of safety management systems and their purpose.
- Appreciate the consequences of behavioral acts and omissions as prime causes of accidents and emergencies.
- Develop a step-by-step safety cultural improvement program within the organization.
- Develop an appreciation of carrying out an HSE cultural positional assessment.
- Develop skills for identifying, evaluating, and reconciling solutions for influencing behavioral change improvement measures.
