MERCURY

Safety Compliance & Site Inspection Training Course

Ref: 7030_291156 **Date:** 10 – 14 May 2027 **Location:** London (UK) **Fees:** 5800 Euro

Introduction

“What you do not measure, you cannot improve on.” Every system, however, sounds on paper and must be checked to see if it works in practice. When human lives are potentially at stake, this measure of effectiveness becomes even more critical. This safety compliance and site inspection training covers the essentials of safety compliance and site inspections.

Participants in the safety compliance and site inspection course will learn that audit involves examining company systems to ensure they are present and comply with legislative requirements. In the safety compliance and site inspection course, we will focus on methods to identify improvements in safety compliance management training.

Achieving Safety Compliance Certification

This module will guide you through obtaining a safety compliance certification. Participants in the safety compliance and inspection certification will get acquainted with critical terminologies, learning paths, and necessary steps to achieve this valuable designation, cementing their commitment to maintaining safety standards and practices.

Targeted Groups

- All Supervisors and Line Management are assigned responsibilities within the organization’s Safety Management System SMS.
- HSE Personnel.
- Operations Personnel.
- Maintenance Personnel.
- Staff involved in contractor work.

Course Objectives

By the end of this complete safety compliance course, participants will be able to:

- Define the sources of harmful acts.
- Understand and accept that safety is a responsibility shared by all.
- Establish that unsafe acts, behavior, and conditions cause accidental injuries.
- Execute a job safety analysis and provide safety instructions.
- Conduct an accident investigation and compose a comprehensive accident report.
- Manage and respond appropriately to various work accidents and emergencies.

Dubai - UAE: +971 4 450 5697
