Strategic Leadership and Project Management

Ref: 15680_320389 **Date:** 6 – 17 September 2027 **Location:** Barcelona (Spain) **Fees:** 9500 Euro

Introduction:

Strategic leadership and project management are integral to modern organizational success. Participants will combine visionary direction with tactical execution to achieve ambitious goals. Strategic leadership involves influencing others, making informed decisions, and driving the organization toward a sustainable competitive advantage. Understanding the role of leadership in project management is essential for project success.

Leadership requires understanding the external environment, internal capabilities, and strategies aligning with the organization's long-term objectives. Project management is a structured application of knowledge, skills, tools, and techniques to meet objectives in project activities. This Strategic Leadership and Project Management course ensures that projects are completed on time, within budget, and to quality standards.

By combining strategic leadership with effective project management, organizations can navigate complex challenges, foster innovation, and harmoniously balance strategic intent and operational efficiency. This Strategic Leadership and Project Management training will equip participants with the essential skills and knowledge to excel in both domains, enabling them to lead with vision and execute precisely.

This Strategic Leadership and Project Management course will delve into why leadership is important in project management and explore the characteristics of strategic project leadership. Participants will develop leadership project management skills that contribute to the effective guidance of projects in alignment with strategic objectives. Trainees will gain insight into advanced project management and strategic leadership and recognize the importance of leadership in project management for driving institutional change and achieving operational goals.
