COBIT 5 Foundation & Implementation Training Course

Ref: 15851_335291 **Date:** 26 – 30 September 2027 **Location:** Cairo (Egypt) **Fees:** 4000 Euro

Introduction:

The COBIT 5 Foundation and Implementation training course introduces the COBIT 5 framework, essential for effective IT governance and management. It equips participants with the foundational knowledge of COBIT 5, its principles, processes, and key components. They will learn to apply COBIT 5 to enhance business value, align IT goals with business objectives, and ensure efficient resource management.

The COBIT 5 Foundation and Implementation course covers implementing COBIT 5 in organizations to drive improvements in governance, risk management, and compliance. It is ideal for IT professionals, managers, and consultants looking to understand COBIT 5 and its practical application in modern organizations. It provides an understanding of strategic security planning, policy, and leadership.

Participants will gain insights into information security strategic planning and the principles of strategic security planning, enabling them to align IT security initiatives with organizational goals. The COBIT 5 Foundation and Implementation course emphasizes the importance of IT security strategic planning, policy, and leadership, fostering governance and strategic planning skills for security.

Attendees will explore the role of strategic culture and national security policy, enhancing their security leadership skills for effective decision-making. This COBIT 5 Foundation and Implementation will address security leadership, focusing on security leadership roles and developing security leadership training to prepare leaders for challenges in modern security environments.
