Risk-Based Internal Audit for Banks

Ref.: 16176_1009497 **Date:** 06 - 10 Dec 2026 **Location:** Amman (Jordan) **Fees:** 3300 **Euro**

Introduction:

In today's dynamic financial environment, internal auditing has evolved from traditional compliance-focused reviews to a strategic risk-based approach that enhances the effectiveness of governance, risk management, and internal control systems. This Risk-Based Internal Audit for Banks course equips professionals with essential skills to align audit priorities with risk exposure and business objectives.

This Risk-Based Internal Audit for Banks program emphasizes proactive identification and assessment of risks in banking operations, supporting improved decision-making and regulatory compliance. By integrating audit planning with enterprise risk management, participants will develop a forward-looking approach to auditing.

The Risk-Based Internal Audit for Banks training introduces modern tools, data analytics, and automation used in internal audit practices. Participants will explore international standards and frameworks that guide risk-based auditing in banking institutions. It is ideal for those seeking practical and technical competencies in evaluating, designing, and leading internal audits in a risk-based environment.

Targeted Groups:

This Risk-Based Internal Audit for Banks training targets professionals seeking specialized knowledge and skills:

- Internal auditors working in commercial or central banks.
- Risk managers are responsible for operational and credit risk.
- Compliance officers seek to align audits with risk frameworks.
- Audit supervisors and team leads prepare risk-based audit plans.
- Financial controllers ensure audit efficiency and risk mitigation.
- External auditors engaged with banking clients.
- Audit committee members in banking institutions.
- Bank regulators and examiners require insight into risk-based audits.
- Professionals in internal control and governance roles.
- Aspiring auditors transitioning into banking internal audit.

Course Objectives:

Participants will achieve the following objectives by completing the Risk-Based Internal Audit for Banks course:

- Understand the principles of risk-based internal auditing in the banking industry.
- Identify and assess key banking risks to inform audit priorities and audit strategies.
- Develop audit plans aligned with enterprise risk assessments.
- Evaluate the effectiveness of internal control in high-risk areas.
- Apply international auditing standards in banking environments.
- Interpret regulatory expectations and compliance benchmarks.
- Utilize risk indicators and risk appetite when scoping audits.
- Design audit tests tailored to operational, financial, and strategic risks.
- Implement data analytics tools in audit planning and execution to enhance audit effectiveness.
- Enhance reporting practices to reflect risk-based audit findings.
- Strengthen communication with audit committees and regulators.
- Build critical thinking for continuous audit improvement.

Targeted Competencies:

Participants will gain the following competencies during the Risk-Based Internal Audit for Banks program:

- Strategic audit planning using risk-based methodology.
- Risk identification and prioritization techniques.
- Internal control assessment and risk mapping.
- Application of Risk Indicators in Audit Scoping.
- Use of audit analytics in financial institutions.
- Alignment with regulatory and industry standards.
- Communication and presentation of audit results.
- Decision-making based on audit risk findings.
- Integration of governance and assurance functions.

Course Content:

Unit 1: Foundations of Risk-Based Internal Auditing in Banks:

- Introduction to internal auditing in financial institutions.
- Evolution from traditional to risk-based auditing.
- Core principles and attributes of risk-based audit.
- Role of internal audit in governance and risk oversight.
- Overview of banking-specific risks: credit, operational, and market.
- Risk-Based Audit vs. Compliance Audit: Key Differences.
- International auditing frameworks e.g., IIA, Basel, COSO.
- Relationship between risk appetite, tolerance, and audit scope.
- Case study: Internal audit's impact on a bank's risk strategy.

Unit 2: Risk Identification, Assessment, and Audit Planning:

- Techniques for identifying and categorizing banking risks.
- Conducting a comprehensive risk assessment.
- Use of risk matrices and heat maps in audit planning.
- Develop audit universe and risk scoring models.
- Linking the risk register to the audit plan objectives.
- Prioritizing audits based on residual and inherent risk.
- Dynamic audit planning based on emerging risks.
- Coordination with Enterprise Risk Management ERM functions.
- Workshop: Creating a risk-based audit plan for a retail bank.

Unit 3: Executing the Risk-Based Audit in Banking Operations:

- Planning and scoping risk-based audits.
- Setting audit objectives and criteria based on risk.
- Designing audit procedures aligned with risk exposures.
- Selecting sampling methods for high-risk areas.
- Documenting control walkthroughs and risk control matrices.
- Performing control tests and risk response analysis.
- Communicating audit findings with a risk-based focus.
- Applying professional skepticism in audit execution.
- Best practices in audit documentation and fieldwork.

Unit 4: Reporting, Follow-Up, and Stakeholder Engagement:

- Structuring effective risk-based audit reports.
- Communicating risk exposures and control deficiencies.
- Incorporating root cause analysis into audit conclusions.
- Risk-rating audit findings and follow-up prioritization.
- Engaging with senior management and audit committees.
- The Role of Internal Audit in Regulatory Inspections.
- Leveraging dashboards and visual analytics in reporting.
- Recommendations tracking and audit issue closure.
- Templates: Sample risk-based audit report and executive summary.

Unit 5: Advanced Tools, Trends, and Integration with Risk Functions:

- Emerging trends: Agile auditing and continuous risk assessment.
- Use of data analytics in risk-based auditing.
- Integration with fraud risk and anti-money laundering audits.
- Enhancing risk culture through audit insights.
- Use of Key Risk Indicators KRIs in audit decision-making.
- Aligning audit work with strategic objectives.
- Benchmarking with global internal audit practices.
- Case analysis: Audit failures due to weak risk focus.
- Course project: Designing an end-to-end risk-based audit cycle.
