Advanced HR Data Management Course

Ref.: 16336_1016307 **Date:** 02 - 06 Aug 2026 **Location:** Cairo (Egypt) **Fees:** 3500 **Euro**

Introduction:

The Advanced HR Data Management course equips HR leaders with the expertise necessary to navigate complex, data-driven HR functions. In today's organizations, HR data has become a central driver for strategic decisions, workforce planning, and business transformation. This advanced program focuses on enhancing analytical skills, mastering HR data systems, and applying predictive insights for organizational impact.

Participants will explore how to manage large datasets, ensure data integrity, and apply compliance standards while supporting business goals. The Advanced HR Data Management training course addresses advanced HR analytics, data visualization, and governance frameworks tailored for senior professionals.

By combining theory with applied scenarios, participants will learn how to transform HR data into actionable strategies. The scope of this Advanced HR Data Management program extends beyond operational processes, preparing HR leaders to adopt a strategic, evidence-based approach to workforce management.

Targeted Groups:

This Advanced HR Data Management training targets professionals seeking specialized knowledge and skills:

- HR Manager - enhance advanced HR data reporting and decision-making.
- Senior HR Manager - lead workforce data projects with precision and accuracy.
- HR Business Partner HRBP - Apply insights to align business strategy.
- Head of HR / HR Director - Drive Organizational Change with HR Data.
- Group HR Director larger organizations - manage cross-regional HR data systems.
- Chief Human Resources Officer CHRO - Strengthen Enterprise-Wide Workforce Planning.
- Chief People Officer CPO - optimize people strategy through advanced analytics.

Targeted Competencies:

Participants will gain the following competencies during the Advanced HR Data Management program:

- Mastery of HR data systems and advanced analytics.
- Strong data visualization and reporting skills.
- Critical thinking for HR problem-solving.
- Strategic workforce planning with evidence-based insights.
- Data governance and compliance expertise.
- Proficiency in managing HR metrics and KPIs.
- Predictive analysis for workforce trends.
- Decision-making using complex data structures.
- Leadership in HR digital transformation.

Course Objectives:

Participants will achieve the following objectives by completing the Advanced HR Data Management course:

- Understand and apply advanced principles of HR data management.
- Analyze complex datasets to drive workforce insights.
- Evaluate data accuracy, quality, and compliance across systems.
- Apply strategic workforce analytics to organizational objectives.
- Create dashboards and data visualizations for executive reporting.
- Implement governance frameworks to ensure data security and integrity.
- Integrate HR data with broader business intelligence systems.
- Identify workforce trends through predictive modeling.
- Solve complex HR problems using evidence-based data.
- Demonstrate proficiency in HR data management tools and platforms.
- Assess the impact of data-driven HR strategies on business results.
- Recommend improvements in HR systems using advanced analytics.
- Align HR metrics with KPIs for business performance.
- Support organizational change with reliable HR data insights.
- Enhance decision-making capabilities through scenario-based analysis.
- Build strategic agility using future-focused HR data practices.

Studying Scenarios:
