Support Functions Management

Ref.: 16429_1020289 **Date:** 26 - 30 Apr 2027 **Location:** London (UK) **Fees:** 5800 **Euro**

Introduction:

In today's dynamic business environment, organizations rely heavily on support functions to maintain operational efficiency and drive strategic initiatives. Support functions encompass areas such as Human Resources, Information Technology, Finance, and Supply Chain Management, which are crucial for the seamless operation of core business activities. Effectively managing these support functions ensures that they align with organizational goals, optimize resource utilization, and contribute to overall business success.

This Support Functions Management course delves into the strategic management of support functions, focusing on enhancing their performance and integration within the organizational framework. Participants will explore best practices, tools, and methodologies to manage support functions effectively. Learners will oversee and improve support functions, ensuring they add value to the organization.

Targeted Groups:

This Support Functions Management training targets professionals seeking specialized knowledge and skills:

- Support function managers aiming to enhance departmental performance.
- HR, IT, Finance, and Supply Chain professionals seeking strategic insights.
- Operations managers looking to optimize support services.
- Business analysts focus on integrating support functions.
- Organizational development specialists aim to align support functions with business goals.
- Consultants advising on support function management strategies.

Course Objectives:

Participants will achieve the following objectives by completing the Support Functions Management course:

- Understand the strategic role of support functions in organizational success.
- Analyze the interdependencies between support and core business functions.
- Develop strategies to enhance the efficiency and effectiveness of support functions.
- Implement best practices for managing support services and resources.
- Utilize tools and methodologies for performance measurement and improvement.
- Align support functions with organizational goals and objectives.
- Manage change and innovation within support functions.
- Foster collaboration and communication between support and core functions.
- Evaluate and mitigate risks associated with support functions.
- Develop leadership skills to manage support function teams effectively.

Targeted Competencies:

Participants will gain the following competencies during the Support Functions Management program:

- Strategic thinking and planning for support functions.
- Analytical skills to assess support function performance.
- Problem-solving abilities to address support function challenges.
- Leadership and team management skills.
- Communication skills for cross-functional collaboration.
- Change management techniques for support functions.
- Risk management strategies within support services.
- Financial acumen related to support function budgeting and cost control.
- Knowledge of technology and tools for support function management.
- Understanding of compliance and regulatory requirements affecting support functions.

Studying Scenarios:

In this Support Functions Management training, participants will develop their skills through the analysis of the following scenarios:

- Aligning IT support services with business objectives to enhance productivity.
- Implementing HR strategies to improve employee engagement and retention.
- Optimizing supply chain processes to reduce costs and improve efficiency.
- Managing financial operations to ensure compliance and profitability.
- Integrating new technologies into support functions to drive innovation.
- Developing communication strategies to improve collaboration between support and core functions.
- Addressing challenges in support function performance and implementing corrective actions.
- Leading change initiatives within support functions to adapt to organizational needs.
- Evaluating the impact of support functions on overall business performance.
- Managing risks associated with support functions to ensure business continuity.
