Effective Contractor Management in Maintenance Technical Projects

Ref.: 121304_1026843 **Date:** 10 - 14 Aug 2026 **Location:** London (UK) **Fees:** 5900 **Euro**

Introduction

Effective Contractor Management in Maintenance Technical Projects equips professionals with the knowledge and skills needed to oversee contractors efficiently. The course focuses on planning, monitoring, and evaluating contractor performance to ensure project success. Participants will learn strategies to mitigate risks, enhance communication, and enforce compliance with safety and quality standards. It emphasizes aligning contractor activities with organizational goals. The program also covers cost control, scheduling, and contract administration. By the end, participants will be able to manage maintenance contractors effectively and confidently.

Targeted Groups

This Effective Contractor Management in Maintenance Technical Projects targets professionals seeking specialized knowledge and skills:

- Maintenance managers and supervisors.
- Project engineers and coordinators.
- Facility and operations managers.
- Safety and compliance officers.
- Procurement and contract specialists.
- Technical project planners.
- Team leaders are responsible for outsourced services.

Course Objectives

Participants will achieve the following objectives by the Effective Contractor Management in Maintenance Technical Projects course:

- Understand contractor selection processes.
- Develop effective contract agreements.
- Implement performance monitoring systems.
- Ensure compliance with safety and quality standards.
- Apply risk management strategies in maintenance projects.
- Improve communication between internal teams and contractors.
- Enhance cost control and budgeting techniques.
- Optimize contractor scheduling and resource allocation.
- Resolve conflicts efficiently and professionally.
- Strengthen oversight and reporting practices.

Targeted Competencies

Participants will gain the following competencies during the program:

- Contractor evaluation and selection skills.
- Contract drafting and management abilities.

- Performance assessment techniques.
- Risk identification and mitigation.
- Compliance enforcement skills.
- Budgeting and cost control expertise.
- Communication and negotiation capabilities.
- Conflict resolution strategies.
- Scheduling and resource coordination skills.
- Reporting and documentation proficiency.

Studying Scenarios

In this training, participants will develop their skills through the analysis of the following scenarios:

- Assessing contractor proposals for technical projects.
- Evaluating contractor safety performance in maintenance activities.
- Monitoring timelines and project milestones.
- Handling contractor disputes and compliance breaches.
- Applying cost control measures during project execution.
