Financial Management for Non-financial Managers Program

Ref.: 121567_1038250 **Date:** 14 - 18 Dec 2026 **Location:** London (UK) **Fees:** 5800 **Euro**

Introduction

This Financial Management for Non-financial Managers program provides a clear and practical understanding of financial management for non-financial managers working across different organizational levels. It bridges the gap between operational responsibilities and financial decision-making by simplifying complex financial concepts into actionable knowledge. Participants will learn how financial data influences business performance and strategic direction. The course emphasizes interpreting financial statements, managing budgets, and evaluating financial risks in a managerial context. It strengthens the ability to communicate effectively with finance teams and senior leadership. Learners will develop confidence in using financial information to support planning, control, and decision-making processes within their departments.

Targeted Groups

This Financial Management for Non-financial Managers program targets professionals seeking knowledge and skills:

- Department managers are responsible for budgeting and cost control decisions.
- Project managers handle financial planning and resource allocation.
- Supervisors are involved in tracking operational performance.
- Team leaders need basic financial literacy for reporting.
- Business owners without a formal finance background.
- Administrative managers oversee expenditures and procurement.

Course Objectives

Participants will achieve the following objectives by completing the Financial Management for Non-financial Managers course:

- Understand the core principles of financial management and how they apply to non-finance roles in organizational settings.
- Interpret key financial statements, including balance sheets, income statements, and cash flow reports, with confidence.
- Develop the ability to manage budgets effectively and align financial planning with operational goals.
- Strengthen skills in cost control, expense monitoring, and identifying financial inefficiencies within departments.
- Apply financial ratios and performance indicators to evaluate business performance and support decision-making.
- Enhance understanding of corporate finance basics, including revenue, profit margins, and cost structures.
- Build capability to communicate financial insights clearly with finance departments and senior leadership.
- Improve analytical thinking in evaluating investment decisions, risk factors, and resource allocation.
- Gain practical awareness of financial planning cycles and reporting requirements.

- Support strategic decision-making using financial data interpretation and managerial accounting principles.

Targeted Competencies

Participants will gain the following competencies during the Financial Management for Non-financial Managers program:

- Ability to read and interpret financial statements accurately for managerial use.
- Strong understanding of budgeting principles and financial planning processes.
- Competence in analyzing costs and identifying areas for financial improvement.
- Skills in monitoring cash flow and ensuring operational financial stability.
- Ability to apply basic financial ratios for performance evaluation.
- Improved decision-making using financial data and reporting insights.
- Understanding of cost structures and their impact on profitability.
- Capability to collaborate effectively with finance teams.
- Strengthened financial awareness for strategic and operational management decisions.

Studying Scenarios

In this Financial Management for Non-financial Managers training, participants develop skills through the following scenarios:

- Real-world budgeting challenges require allocating limited resources across departments.
- Case studies on interpreting financial reports to identify performance gaps.
- Situations involving cost overruns and corrective financial actions.
- Decision-making exercises based on profitability and investment evaluation scenarios.
- Operational planning simulations integrating financial constraints and business goals.
