Human Capital and Talent Management Program

Ref.: 121587_1039154 **Date:** 08 - 12 Feb 2027 **Location:** Boston (USA) **Fees:** 7500 **Euro**

Introduction

Human Capital and Talent Management is a strategic discipline focused on optimizing the value of people within organizations. It explores how to develop skills, knowledge, and capabilities to support long-term organizational success. The Human Capital and Talent Management program provides a structured understanding of how workforce planning and talent strategies align with business objectives. It emphasizes modern approaches to attracting, developing, and retaining high-performing employees. Participants will examine how data, leadership, and organizational culture shape workforce effectiveness. The course covers both theoretical foundations and practical applications in contemporary human resource environments.

Targeted Groups

This Human Capital and Talent Management program targets professionals seeking knowledge and skills:

- HR specialists are aiming to strengthen human capital management practices.
- Talent acquisition professionals are involved in recruitment and selection processes.
- Line managers are responsible for team performance and workforce development.
- Organizational development practitioners focus on strategic workforce planning.
- Training and development officers manage employee growth programs.
- Business leaders are seeking to improve employee engagement and retention strategies.
- Consultants supporting workforce transformation and HR modernization initiatives.

Course Objectives

Participants will achieve the following objectives by completing the Human Capital and Talent Management course:

- Develop a strong understanding of human capital management principles and strategic talent frameworks.
- Learn how to align workforce planning with organizational goals and long-term business vision.
- Understand talent acquisition strategies that improve hiring quality and reduce turnover risk.
- Explore performance management systems that enhance employee productivity and accountability.
- Gain insights into employee engagement practices that foster motivation and commitment.
- Analyze workforce development approaches, including training, upskilling, and reskilling programs.
- Understand succession planning techniques to ensure leadership continuity.
- Apply HR analytics to support data-driven decision-making in talent management processes.
- Strengthen the ability to evaluate organizational capability gaps and design improvement strategies.
- Build competence in integrating human resource practices with the overall organizational strategy.

Targeted Competencies

Participants will gain the following competencies during the Human Capital and Talent Management program:

- Ability to design and implement effective human capital strategies aligned with organizational priorities.
- Skills in workforce planning and forecasting future talent needs.
- Competence in managing recruitment cycles and selecting high-quality candidates.
- Proficiency in performance evaluation systems and employee feedback mechanisms.
- Capability to enhance employee engagement through structured initiatives.
- Understanding of learning and development frameworks for continuous workforce improvement.
- Ability to apply succession planning models to ensure leadership continuity.
- Skills in interpreting HR data and workforce analytics for decision-making.
- Competence in identifying skill gaps and recommending targeted development solutions.

Studying Scenarios

In this Human Capital and Talent Management training, participants develop skills through the following scenarios:

- Analyzing workforce shortages and designing recruitment strategies to meet organizational demand.
- Evaluating employee performance issues and implementing improvement plans.
- Developing engagement programs to reduce turnover in high-pressure environments.
- Building succession planning models for critical leadership roles.
- Applying HR analytics to predict workforce trends and support strategic decisions.

Course Content
