Advanced Industrial Hygiene Professional: Chemical Exposure Assessment, Sampling & Control Program

Ref.: 121653_1041800 **Date:** 28 Sep - 09 Oct 2026 **Location:** Accara (Ghana) **Fees:** 9500 Euro

Introduction

This Advanced Industrial Hygiene Professional: Chemical Exposure Assessment, Sampling & Control program provides an understanding of industrial hygiene practices focused on chemical exposure assessment, monitoring, and control strategies in occupational environments. It equips learners with the scientific and technical foundations needed to identify, evaluate, and manage chemical hazards in the workplace. Participants will explore exposure pathways, toxicological principles, and regulatory frameworks that govern occupational safety. The course emphasizes practical methodologies for air sampling, exposure modeling, and risk evaluation. It integrates modern industrial hygiene program development techniques aligned with global best practices. Learners will implement effective exposure control systems and improve workplace health outcomes.

Targeted Groups

This Advanced Industrial Hygiene Professional: Chemical Exposure Assessment, Sampling & Control program targets professionals seeking knowledge and skills:

- Industrial hygienists manage workplace exposure risks.
- Occupational health and safety officers in industry.
- Environmental health and safety engineers.
- Chemical safety and compliance professionals.
- Laboratory and quality control technicians.
- Risk management and safety consultants.
- Regulatory inspectors and auditors.
- HSE managers in industrial sectors.

Course Objectives

Participants will achieve the following objectives by completing the Advanced Industrial Hygiene Professional: Chemical Exposure Assessment, Sampling & Control course:

- Understand core industrial hygiene principles and hazard recognition.
- Apply toxicology concepts in workplace exposure evaluation.
- Classify and interpret chemical hazards using SDS systems.
- Use exposure assessment frameworks and Similar Exposure Groups.
- Conduct air sampling and accurately interpret monitoring results.
- Analyze exposure data and assess variability and trends.
- Evaluate occupational exposure limits and regulatory requirements.
- Implement engineering and administrative exposure controls.
- Perform chemical risk assessment and prioritization.
- Develop structured industrial hygiene programs and audits.

Targeted Competencies

Participants will gain the following competencies during the Advanced Industrial Hygiene

Professional: Chemical Exposure Assessment, Sampling & Control program:

- Hazard identification and chemical risk classification skills.
- Exposure assessment and modeling capability.
- Air sampling and monitoring system design knowledge.
- Data interpretation and statistical evaluation skills.
- Regulatory compliance and OEL application expertise.
- Engineering and PPE control selection ability.
- Risk management and exposure reduction planning skills.
- Industrial hygiene program development competency.

Studying Scenarios

In this Advanced Industrial Hygiene Professional: Chemical Exposure Assessment, Sampling & Control training, participants develop skills through the following scenarios:

- Evaluating chemical exposure in manufacturing environments.
- Designing personal and area sampling strategies.
- Interpreting toxicology data for workplace hazards.
- Applying OELs and compliance standards in real cases.
- Developing exposure control solutions for chemical risks.
- Analyzing exposure trends and reporting findings.

Course Content

Unit 1: Foundations of Industrial Hygiene

- Industrial Hygiene Principles.
- Occupational Health Programs.
- Hazard Recognition.
- Chemical Hazard Categories.

Unit 2: Toxicology for Industrial Hygienists

- Fundamentals of Toxicology.
- Dose-Response Relationships.
- Acute and Chronic Effects.
- Target Organ Effects.
- Exposure Pathways.

Unit 3: Chemical Hazard Identification and Classification

- Hazard Communication Systems.
- Safety Data Sheets SDS.
- Chemical Classification Systems.
- Workplace Chemical Inventories.

Unit 4: Occupational Exposure Assessment Methodologies

- Exposure Assessment Frameworks.
- Similar Exposure Groups SEGs.
- Exposure Profiling.

- Exposure Modeling Concepts.

Unit 5: Air Sampling and Monitoring Techniques

- Personal Sampling Methods.
- Area Sampling Strategies.
- Sampling Equipment.
- Monitoring Program Design.
- Quality Assurance Principles.

Unit 6: Exposure Data Interpretation and Evaluation

- Exposure Data Analysis.
- Exposure Variability.
- Exposure Trend Assessment.
- Statistical Considerations.
- Compliance Evaluation.

Unit 7: Occupational Exposure Limits and Regulatory Requirements

- OEL Concepts.
- TLVs.
- PELs.
- International Standards and Guidelines.
- Regulatory Compliance Requirements.

Unit 8: Exposure Control Technologies

- Engineering Control Systems.
- Ventilation Principles.
- Process Isolation.
- Administrative Controls.
- PPE Programs.

Unit 9: Chemical Risk Assessment and Management

- Risk Characterization.
- Risk Prioritization.
- Exposure Reduction Planning.
- Chemical Risk Management Programs.
- Continuous Improvement Approaches.

Unit 10: Industrial Hygiene Program Development and Best Practices

- Developing Exposure Monitoring Programs.
- Industrial Hygiene Audits.
- Reporting and Documentation.
- Management Review Processes.
- Global Best Practices in Industrial Hygiene.

Final Insights & Key Takeaways

Dubai - UAE: +971 4 450 5697
Istanbul - Türkiye: +90 539 599 1206
Amman - Jordan: +962 79 712 3347

This course builds strong expertise in chemical exposure assessment, industrial hygiene monitoring, and workplace safety compliance. It enables professionals to design effective exposure control systems and strengthen occupational health programs across industries.

**Registration form on the :
Advanced Industrial Hygiene Professional: Chemical Exposure Assessment, Sampling & Control Program**

code: 121653 **From:** 28 Sep - 09 Oct 2026 **Venue:** Accara (Ghana) **Fees:** 9500 **Euro**
