Advanced Stakeholder Management

Ref.: 121731_1044697 **Date:** 27 - 31 Jul 2026 **Location:** Casablanca (Morocco) **Fees:** 4500 Euro

Introduction

This course focuses on building a structured understanding of stakeholder dynamics in modern organizations. It explores how stakeholder expectations influence strategic decisions and operational outcomes. Participants learn to identify, analyze, and effectively prioritize different stakeholder groups. The program strengthens communication approaches that support alignment and long-term engagement. It highlights practical models used in stakeholder relationship management and governance structures. It builds capability in managing complex stakeholder environments across sectors.

Targeted Groups

This Advanced Stakeholder Management training targets professionals seeking knowledge and skills:

- Project managers handling multi-stakeholder environments and delivery expectations
- Business analysts working on stakeholder requirements and engagement planning
- HR and organizational development teams are managing internal stakeholder relations
- Public sector professionals dealing with governance stakeholders and policy impact
- Consultants supporting client engagement and stakeholder mapping activities
- Program managers coordinating cross-functional stakeholder communication
- Team leaders responsible for stakeholder engagement and decision alignment

Course Objectives

Participants will achieve the following objectives by completing the Advanced Stakeholder Management course:

- Understand stakeholder identification methods and structured approaches to stakeholder analysis.
- Apply stakeholder mapping techniques to classify influence, interest, and impact levels.
- Develop stakeholder engagement plans aligned with organizational and project goals.
- Strengthen stakeholder communication strategy for clarity, trust, and consistency.
- Manage stakeholder expectations through structured reporting and feedback mechanisms.
- Improve stakeholder relationship management across internal and external groups.
- Align stakeholder needs with strategic planning and corporate governance requirements.
- Handle conflicts and resistance using practical stakeholder negotiation approaches.
- Integrate stakeholder engagement effectively into change management processes.

Targeted Competencies

Participants will gain the following competencies during the Advanced Stakeholder Management program:

- Ability to conduct structured stakeholder analysis and build stakeholder profiles.
- Competence in stakeholder mapping using influence and interest classification models.

- Skills in designing stakeholder engagement frameworks and communication pathways.
- Capability to manage stakeholder expectations across complex organizational settings.
- Proficiency in stakeholder relationship management and trust-building practices.
- Ability to align stakeholders with strategic objectives and governance structures.
- Skills in managing change management stakeholders during transformation initiatives.
- Competence in conflict resolution and negotiation with diverse stakeholder groups.

Studying Scenarios

In this Advanced Stakeholder Management training, participants develop skills through the following scenarios:

- Mapping stakeholders for a large-scale organizational transformation project.
- Designing a stakeholder engagement plan for a multi-department initiative.
- Managing resistance from key stakeholders during digital transformation programs.
- Aligning corporate governance stakeholders with new policy implementation goals.
- Handling conflicting stakeholder expectations in a cross-functional project environment.
- Developing communication strategies for high-impact stakeholder groups.

Course Content
