ORCA Lead Auditor

15 - 19 Mar 2027
Munich (Germany)

Operational Risk & Control Assurance ORCA Lead Auditor

Ref.: 121773_1046843 **Date:** 15 - 19 Mar 2027 **Location:** Munich (Germany) **Fees:** 5600 Euro

Introduction

This Operational Risk & Control Assurance ORCA Lead Auditor course provides an understanding of the field principles within modern organizational environments. It focuses on strengthening the ability to evaluate operational risks and assess internal control systems with precision and consistency. Participants will explore structured auditing approaches that support governance, compliance, and performance improvement. The program highlights the relationship between operational risk management and effective control assurance frameworks. It equips learners with the analytical mindset to identify weaknesses and strengthen control environments. It emphasizes practical auditing perspectives aligned with international standards and organizational best practices.

Targeted Groups

This Operational Risk & Control Assurance ORCA Lead Auditor training targets professionals seeking knowledge and skills:

- Internal auditors are responsible for evaluating control systems and compliance processes.
- Risk management professionals are involved in identifying and mitigating operational risks.
- Compliance officers ensure adherence to policies and regulatory standards.
- Governance and assurance specialists oversee the effectiveness of controls.
- Quality assurance professionals improve operational performance and reliability.
- Finance and control analysts supporting risk-based decision-making.
- Operational managers handle process efficiency and risk reduction.
- Audit team leaders conduct structured assurance reviews.

Course Objectives

Participants will achieve the following objectives by completing the Operational Risk & Control Assurance ORCA Lead Auditor course:

- Understand operational risk frameworks and control assurance methodologies used in modern organizations.
- Accurately identify, assess, and prioritize operational risks across business functions.
- Evaluate internal controls and determine their effectiveness in reducing risk exposure.
- Design and implement structured audit plans aligned with governance and compliance requirements.
- Strengthen their capability to conduct risk-based audits and to document findings clearly.
- Enhance decision-making skills for recommending corrective actions and improvements.
- Support organizational resilience through effective risk and control assurance practices.

Targeted Competencies

Participants will gain the following competencies during the Operational Risk & Control Assurance ORCA Lead Auditor program:

- Ability to assess operational risks across complex business environments.
- Competence in evaluating internal control systems and assurance frameworks.
- Skills in planning and executing structured audit assignments.
- Proficiency in identifying control weaknesses and recommending improvements.
- Capability to apply risk-based auditing techniques effectively.
- Strong analytical thinking for interpreting audit findings and data.
- Enhanced reporting skills for clear and actionable audit documentation.

Studying Scenarios

In this Operational Risk & Control Assurance ORCA Lead Auditor training, participants develop skills through the following scenarios:

- Evaluating operational disruptions and identifying root causes in real business settings.
- Assessing control failures in financial and operational processes.
- Conducting audit simulations for compliance and governance reviews.
- Analyzing risk exposure in service delivery and supply chain operations.
- Developing corrective action plans based on audit findings.

Course Content

Unit 1: Foundations of Operational Risk & Control Assurance
