Creative Excellence in Corporate Asset and Property Management

Ref.: 121876_1055960 **Date:** 16 - 20 Nov 2026 **Location:** Paris (France) **Fees:** 5900 **Euro**

Introduction

In today's business environment, asset and property management has become a strategic tool that enhances organizational excellence and supports long-term sustainability. This Creative Excellence in Corporate Asset and Property Management program enables participants to develop their capabilities in asset planning and managing the associated risks. It addresses the latest global approaches and international standards, such as ISO 55000, which guide organizations toward more efficient strategies. It focuses on best practices in corporate property management to enhance reliability, reduce costs, and improve overall performance.

This Creative Excellence in Corporate Asset and Property Management course provides an integrated understanding of the asset life cycle, from design to safe disposal, while leveraging digital transformation in organizations to support management decisions. It highlights the importance of creativity in developing innovative solutions to asset management challenges. It presents successful property management models in companies to demonstrate how innovation improves organizational outcomes. It helps strengthen a culture of continuous improvement and resilience in addressing asset management challenges in the digital era.

Targeted Groups

The Creative Excellence in Corporate Asset and Property Management course is designed for the following professionals and individuals seeking to acquire knowledge and skills:

- Asset and property managers in companies.
- Operations, maintenance, and facilities managers.
- Quality, environmental, health, and safety professionals.
- Project, engineering, and technical managers.
- Supply chain and procurement professionals.
- Specialists in enterprise risk management.
- Individuals interested in improving organizational performance.
- Anyone seeking to develop their skills in corporate investment and asset management.

Course Objectives

By the end of this training program on Creative Excellence in Corporate Asset and Property Management, participants will be able to:

- Understand the fundamental principles of asset management in an organizational environment.
- Analyze the relationship between the asset life cycle and cost reduction.
- Design effective plans for property maintenance and performance improvement.
- Assess asset-related risks and apply proactive strategies.
- Develop contingency plans that support business continuity.
- Use analytical tools to make informed decisions.
- Apply performance evaluation techniques to measure management effectiveness.
- Develop creativity skills in organizations to support property management.

- Translate technical data into outcomes that enhance organizational sustainability.
- Apply successful models to improve asset strategies in companies.
- Strengthen the ability to integrate digital transformation in organizations into asset management.
- Build strategies that support organizational excellence and achieve practical results.
- Evaluate the impact of training on improving asset management practices.
- Develop long-term plans that create value from assets.
- Understand how to measure the impact of management on organizational performance.

Targeted Competencies

Participants will acquire the following competencies through the Creative Excellence in Corporate Asset and Property Management program:

- Develop strategic asset management plans.
- The skill to identify and assess risks.
- Competence in asset life cycle management.
- Apply best practices in corporate property management.
- Proficiency in life cycle cost analysis.
- Use of asset information systems.
- Financial understanding of asset-related decisions.
- Leadership skills in managing change.
- Develop asset policies.
- Understand organizational sustainability requirements.
- Ability to link management practices to organizational outcomes.

Real-world Case Studies

During the Creative Excellence in Corporate Asset and Property Management training, participants will develop their capabilities through the study of the following scenarios:

- An industrial organization facing recurring failures in its critical equipment.
- A real estate company seeking to evaluate the effectiveness of its property management.
- A service organization applying corporate asset management strategies to reduce costs.
- Addressing the impact of creativity on improving corporate performance.
- A company undergoing digital transformation in asset management.
- An organization that needs to develop a contingency plan following an asset system failure.
- A real-world case illustrating the impact of training on improving management practices.
- A study of technical challenges in modern asset management.
- An analysis of a successful model in corporate property management.
