Introduction to Corporate and Financial Restructuring

Corporate financial restructuring encompasses a range of strategies to reorganize a company's economic and financial structure to increase stakeholder value.

Mismanagement and external factors can often erode this value, and the financial restructuring course is imperative to understand how to implement change effectively.

In this corporate financial restructuring course, we delve into the intricacies of corporate and financial restructuring, emphasizing the practical approaches to addressing such challenges in today's rapidly evolving business landscape.

We aim to give participants robust knowledge of financial restructuring and how to differentiate it from operational restructuring, providing them with the tools and frameworks necessary for making informed decisions in real-world scenarios.

Targeted Groups

- Top management of corporations.
- Finance managers.
- Finance professionals.
- Operations professionals.
- Individuals seeking to enhance financial and managerial acumen.

Course Objectives

Upon completion of this financial restructuring course, participants will:

- Gain a comprehensive understanding of the various forms of restructuring.
- Discuss the distinctions between corporate and financial restructuring.
- Evaluate the strategic choices between acquiring and divesting operating units.
- Develop effective techniques to value entities or entire firms.
- Explore strategies for leveraging and deleveraging.
- Assess the risks and benefits associated with corporate and financial restructuring models.
- Understand the risks and rewards of leverage.
- Calculate the value of the firm in the real world.
- Understand the cost and benefits of divestiture.
- Enhance their knowledge with the use of restructuring modeling.
