# Advanced Cash Flow & Working Capital Management Course

**Ref.:** 2006\_244845 **Date:** 07 - 11 Oct 2024 **Location:** London (UK) **Fees:** 5200 **Euro**

## Introduction

In recent years, there has been a growing recognition that, in the long run, effective management of cash flow is more important than profit. Long-term working capital and cash flow management are the actual value of a business.

The working capital and cash flow management course has also recognized the significant potential for improved financial performance from the more effective management of working capital - directly from immediate cash gains and reduced net interest costs and indirectly through its impact on increased profitability and return on capital employed.

A key challenge in achieving these performance improvements results from the fact that actual working capital levels and cash flow delivery are effectively determined by the day-to-day actions of many managers and staff, which in large corporations often run into tens of thousands.

This Advanced Cash Flow and Working Capital Management Course covers the principles, techniques, and skills involved in effectively managing cash flow and working capital in any business and aligns with professional cash flow management seminars and a week's Cash Flow training course to enhance financial proficiency.

## A Week Cash Flow Model Training

As part of our advanced cash flow course, participants will delve into the intricacies of a week's cash flow model training.

This advanced cash flow course critical financial tool aids businesses in forecasting and planning their short-term cash requirements.

This cash flow model training underscores the importance of precision and strategic forecasting in maintaining corporate liquidity and securing financial stability.
