Effective Global Procurement and Logistics Management

Ref.: 4035_245908 **Date:** 30 Sep - 11 Oct 2024 **Location:** Amsterdam (Netherlands) **Fees:** 8500 Euro

Introduction

This new approach to global procurement and logistics management seeks to optimize the value derived from procurement activities by combining traditional methods with advanced tools, techniques, and innovative approaches.

Participants in the effective procurement and logistics management course will gain insights into the category management methodology and acquire the necessary knowledge to apply this approach successfully implemented by world-class organizations.

The effective procurement and logistics management seminar illustrates how category management, encompassing supplier sourcing, management, development, and relationship management, significantly contributes to economic profit in stellar supply chains.

By the end of the effective procurement and logistics management course, attendees will understand how to realize these advantages, how effective global procurement is, and how the supply chain can create economic profit for world-class supply chains; we will also demonstrate how this can be achieved.

The effective procurement and logistics management course integrates a wealth of concepts key to understanding effective procurement and global procurement best practices. It aims to deliver a comprehensive educational experience that prepares professionals to navigate and excel in the complex, interconnected realm of global procurement and logistics.
