Strategic Accounting Essentials for Non-Finance Managers: Guiding Business Decisions

Ref.: 1087_246570 **Date:** 07 - 11 Sep 2025 **Location:** Sharm El-Sheikh (Egypt) **Fees:** 4000 Euro

Introduction

Managerial accounting is an essential activity that provides financial and non-financial information to business managers and other internal decision-makers.

This comprehensive decision-making training course focuses on how such accounting information is compiled, how professionals can effectively utilize it to make solid plans and informed decisions, and imbues learners with the concepts, procedures, and analytical skills necessary to navigate the complex business world today.

Specialized Course for Enhanced Financial Capability

For those interested in a targeted development of their overseeing capabilities, our specialized financial controller training course and certified financial controller courses provide the knowledge and tools needed to achieve proficiency in financial control, compliance, and the strategization of business finance operations.

Data-Driven Decision Making

This data-driven decision-making course ensures that participants are well-equipped to interpret and leverage financial data in their business, enhancing their ability to make astute decisions informed by robust financial analysis.

Finance for Non-Financial Managers

Our finance courses for non-financial managers, encompassing finance and budgeting for non-financial managers and finance for the non-financial manager courses, are tailor-made to transform managers without financial backgrounds into adept custodians of their departments or organizations' financial health.

Targeted Groups

- Managers
- Supervisors
- Staff from any function, including the accounting department, must improve their understanding, application, and techniques related to the language of numbers and managerial accounting.

Course Objectives

By the end of this financial management for non-financial managers course, participants will be able to:

- Explain the functions of financial management.
- Define the four critical financial statements: balance sheet, income, cash flow, and changes in owner equity.
- Interpret the financial health of a company or profit center.
- Master capital budgeting and cost-volume-profit analysis.
- Use financial information to manage the business or its departments.

Targeted Competencies

- Accounting for business transactions
- Preparing income statements
- Interpreting balance sheets
- Analyzing cash flow statements
- Preparing adjustment entries
- Using debits and credits
- Applying international financial reporting standards
