

Environmental Management Training Conference

11 - 20 May 2025
Cairo (Egypt)

Environmental Management Training Conference

Ref.: 8162_248194 **Date:** 11 - 20 May 2025 **Location:** Cairo (Egypt) **Fees:** 3000 **Euro**

Introduction:

No business can sustain a policy that is unfriendly to the environment, people's safety, or society. Society and legislation are ever-increasingly pressuring businesses to maintain environmentally friendly production processes. This environmental management conference gives sound qualifications to all managers in environmental management.

Professionals must appreciate the environmental effects of production and how these issues relate to climate change, biodiversity, and environmental pollution. The environmental management system conference covers these areas and the relationship between environmental protection and production efficiency, as well as environmental management techniques, legislation, and emergency response.

Targeted Groups:

- Production and Process Engineers
- Maintenance Engineers.
- People who are involved in the managing and purchasing of hazardous substances.
- Managers, Supervisors, and Consultants who will be part of an Environmental Management Systems Implementation Team.
- Anyone involved in implementing, maintaining, or supervising an ISO 14001.

Understanding the Advantages of Environmental Management Systems:

Understanding the advantages of environmental management systems conference provides a comprehensive platform for industry professionals to delve into the intricacies of environmental management systems EMS. This environmental management conference offers valuable insights into the benefits of implementing EMS in various sectors, emphasizing its role in enhancing sustainability practices, reducing environmental impact, and improving overall organizational performance.

Attendees can expect enlightening discussions, case studies, and interactive sessions led by experts in the field, enabling them to gain practical knowledge and strategic approaches for integrating EMS into their operations effectively. With a focus on promoting environmental stewardship and compliance with regulations, this conference is a pivotal gathering for fostering collaboration, innovation, and continuous improvement in environmental management practices across industries.

Conference Objectives:

At the end of this environmental management conference, the participants will be able to:

- Understand the business benefits of sound environmental management
- Appreciate the environmental management systems
- Know how legislation and international conventions affect businesses
- Become knowledgeable of environmental terms
- Understand the process of waste minimization
- Explore the types of emergencies that have effects on the environment
- Plan an environmental management program

Targeted Competencies:

At the end of this environmental management conference, the target competencies will be able to:

- Environmental Management.
- Environmental Legislation.
- Context of Environment.
- Environmental Policy.
- Emergency Planning.

Conference Content:
