Patient Affairs Management (Patient Service, Safety, and Satisfaction)

Ref.: 15056_251705 **Date:** 15 - 19 Dec 2024 **Location:** Sharm El-Sheikh (Egypt) **Fees:** 3500 Euro

Introduction:

The patient affairs, service, safety, and satisfaction management course has become a hallmark for assessing the excellence of healthcare organizations in delivering high-quality, safe, and satisfying patient experiences. As the front line of patient interaction, the efficiency and effectiveness of patient affairs management can significantly influence an organization's reputation and long-term success.

This patient affairs, service, safety, and satisfaction management program equips participants with the skills to formulate and execute a patient experience framework to enhance their organization's overall performance. Enrollees will discover methods to develop high-performing healthcare teams, foster productive clinical relationships, and execute patient-centered strategies and tools.

This comprehensive patient affairs, service, safety, and satisfaction management training course aims to elevate the standard of patient affairs management. It integrates fundamental concepts with enhanced strategies to ensure exceptional patient service, safety, and satisfaction.

Targeted Groups:

- Management of Hospitals and Healthcare.
- Patient Affairs Managers.
- Patient Affairs Professionals.
- Quality Management in Hospitals and Healthcare Organizations.

Course Objectives:

Upon completing this patient affairs, service, safety, and satisfaction management course, participants will:

- Recruit and engage employees dedicated to delivering compassionate and high-quality patient care.
- Foster effective clinical relationships by utilizing leading communication strategies.
- Promote a culture of coaching that consistently delivers exceptional care and service.
- Recognize and cater to patients' unique values, preferences, and needs.
- Design and implement a patient experience framework that fulfills and surpasses patient expectations.
- Gain insights into bed management within healthcare facilities.

Targeted Competencies:

Upon completing this patient affairs, service, safety, and satisfaction management training, participants competencies will:

- Communication skills.
- Patient-Centered Care.
- Customer Patient-Focused.
- Patient Satisfaction.
- Patient plan tree construction.
- Understand patient services and care management delivery.

Patient Affairs, Service, Safety, and Satisfaction Management Training:

Given the significant role of patient safety in healthcare, this patient affairs, service, safety, and satisfaction management course includes a comprehensive outline that aligns with a patient safety certificate program.

It ensures that participants pursuing a patient affairs, service, safety, and satisfaction management certificate can access relevant training. We examine the definition of patient safety and delve into the roles of a patient safety specialist and a patient safety manager, emphasizing the practical aspects of patient safety management and patient management services.

Instructive modules on patient satisfaction training underscore techniques for improving patient satisfaction, thereby optimizing the patient experience. We dissect what patient satisfaction entails and engage in exercises focused on improving patient satisfaction. Strategies discussed will benefit roles such as the patient care services manager and the patient services manager.

A segment on patient management includes examining a patient management system and discussing its components. Crucial patient management skills and principles of a patient management course are covered, further preparing participants to take on the role of a patient affairs manager or other engaged staff in patient affairs with greater competence and impact on patient outcomes.
