Transforming the Patient Experience Training

Ref.: 15079_253097 **Date:** 24 - 28 Feb 2025 **Location:** Paris (France) **Fees:** 4900 Euro

Introduction:

The "patient experience" has become a primary and leading excellence benchmark for a best-in-class healthcare organization's quality, safety, and service performance. The patient experience is a journey that can take a healthcare organization to the top of the patient care league. However, it can also help an organization's reputation and sustainability if efficient.

The transforming patient experience course gives participants the knowledge and skills to design and implement a patient experience-based framework to improve their organization's overall performance. Participants will learn how to build high-performing and engaged healthcare teams, establish and sustain effective clinical relationships, and implement strategies and tools to support patient-centered care.

Defining Patient Experience:

Before diving deeper into how to transform it, let's define patient experience. It encompasses all aspects of a patient's interaction with the healthcare system, including their care from health plans and doctors, nurses, and staff in hospitals, physician practices, and other healthcare facilities. Making positive changes to these interactions can significantly enhance the quality of care and patient satisfaction.

For those eager to gain more profound expertise in this field, a patient experience certification can demonstrate a professional commitment to enhancing the patient experience. Acquiring a patient experience certificate is a testament to the skills learned and the readiness to apply them effectively in healthcare settings.

Targeted Groups:

- Healthcare Clinical and Non-clinical Staff.
- Healthcare Line Managers.
- Heads of Department.
- Operational Executives.
- Vendors involved in direct and indirect support services.

Course Objectives:

At the end of this transforming patient experience course, the participants will be able to:

- Attract and engage customer-focused employees passionate about providing the best and most compassionate yet efficient care to the patient.
- Establish and sustain effective clinical relationships by leveraging key internal and external communication strategies.
- Build a coaching culture that supports consistent, exceptional care and service.
- Identify and address the differences in patients' values, preferences, and expressed needs.
- Design a patient experience framework that meets and exceeds the patient's needs.

Targeted Competencies:

By the end of this transforming patient experience training, the participant's competencies will be able to:

- Applying communication skills.
- Demonstrating Coaching skills.
- Improving employee and patient engagement.
- Implementing service excellence.
- Patient experience design.

Course Content:

Unit 1: Building Effective Clinical Relationships:

- The clinical value system.
- The impact of organizational culture on working relationships.
- The impact of clinical relationships on the patient experience.
- Clinical relationships assessment.
- Roadblocks in clinical relationships.
- Opportunities in clinical relationships.
