

## Process Safety Management Compliance Conference

17 - 20 Mar 2025  
Munich (Germany)

# Process Safety Management Compliance Conference

**Ref.:** 8174\_254501 **Date:** 17 - 20 Mar 2025 **Location:** Munich (Germany) **Fees:** 4900 **Euro**

## Introduction:

Most Process Organizations have implemented an integrated approach to managing health, safety, and environmental HSE risks through an HSE Management System. This process safety management compliance and standards program aims to highlight the benefits of such a system and its elements based on industry best practices.

This process safety management compliance and standards conference is designed to help delegates demonstrate compliance with the organization's HSE Management System, focus on risk management, and promote a positive safety culture.

## What is Process Safety Management?

Process Safety Management PSM is a vital part of the HSE Management System, which focuses on preventing the release of any substance that could cause a significant safety threat. PSM embodies the integration of process safety management standards, requirements, and compliance guidelines to reduce the risk and impact of hazardous incidents within the processing industry.

## Targeted Groups:

- Those needing to implement or maintain an effective PSM program.
- Those who will be leading compliance auditing and risk management program compliance efforts.
- Anyone who deals with industry regulators.

## Conference Objectives:

At the end of this process safety management compliance and standards conference, the participants will be able to:

- Describe the company's HSE Management Systems.
- Demonstrate compliance with elements, sub-elements, and expectations of the HSE-MS.
- Understand the role of risk management in terms of risk assessment and incident investigation and analysis.
- Appreciate the role of human error in risk assessment and contribution to incidents.
- Identify weaknesses in the HSE-MS through analysis of root causes for incidents.
- Be familiar with the requirements of HSG65, BS 8800, OHSAS 18000, ISO 9000, and ISO 14000.
- Prepare action plans, setting targets, and measuring performance.
- Appreciate the value of promoting a positive safety culture within your organization.

## Targeted Competencies:

At the end of this process safety management compliance and standards conference, the target competencies will:

- Appreciating the role and responsibilities within the HSE Management System.
- Enhancing the knowledge of elements, sub-elements, and expectations of the HSE-MS.
- Necessary skills in carrying out practical risk assessment and incident investigation and analysis.
- Developing a plan for promoting a positive safety culture.

## Purpose of Process Safety Management Compliance and Standards:

The core purpose of process safety management is to develop a systematic approach to evaluating and controlling process safety risks within industrial and chemical process facilities. Understanding this purpose and implementing it is paramount to protecting the health and safety of employees and the public and preserving the environment.

Safety compliance standards refer to the regulatory requirements and voluntary guidelines that organizations must adhere to ensure safe operations. Compliance with these standards is critical, embodying what safety compliance means and being committed to operating responsibly and minimizing risks.

## Conference Content:

### Unit 1: Introduction to HSE Management Systems:
