Manama (Bahrain)

# The Contracts & Project Management Mini Master MBA Course

**Ref.:** 4074\_254528 **Date:** 06 - 17 Jul 2025 **Location:** Manama (Bahrain) **Fees:** 7000 **Euro**

## Introduction

In today's competitive global economy, virtually all organizations are project-based. Whether they are governmental, industrial, or commercial, these organizations supply products or services intended to satisfy the needs and requirements of their clients by applying the principles and methodologies of project management to implement their projects.

All of these projects rest on the foundation of contracts, and the interaction between project management and contracts, also known as contracts in project management or project management contracts, is vital for project success.

Utilizing the project contracting process and drawing from extensive knowledge in MBA contract management, this contracts and project management course dives into the essentials of forming a contract that will serve the needs of the project effectively.

Aspiring contract project managers will gain insights into the project contract management process, which enables the alignment of project objectives with contractual obligations and the roles that project contract managers play.

## Target Groups

- Contracts management professionals.
- Project management professionals.
- Tendering, purchasing, contract administration professionals and personnel.
- Engineering, operational, finance, and maintenance professionals.
- This contracts and project management course is for all others who are involved in project work from simple to complex that cover the acquisition of materials, equipment, construction, and services and who are in organizations whose leadership wants high levels of competency in those involved in these activities.

## Course Objectives

At the end of this MBA in contracts and project management course, the participants will be able to:

- Establish project goals and objectives that are directly linked to stakeholders' needs and expectations.
- Develop and use work breakdown structures.
- Develop realistic and measurable objectives to ensure positive results for project performance.
- Estimate project time and costs using proven techniques.
- Establish an effective project control system and monitor project progress efficiently.
- Use a practical, step-by-step process to manage project risks.
- Identify threats and opportunities to your project and weigh their relative values.
- Utilize tried and proven project management tools and techniques to get the jobs done on time, within budget, and following client's requirements.
- Understand the issues behind contracts.
- Explore ways of creating contracts and the different strategies available for different types of projects.
- Review different types of contracts.
