Introduction:

Medical insurance is one of the most important financial sources that cover the cost of medical treatment in the private health sectors, it's a contract between the health insurance holder and the insurance company, medical insurance has conditions and the purchaser of the insurance contract must read it carefully in order to be fully aware of all terms.

Also, individual and Groups insurance contracts have disclosure included in the insurance application, referring to the statements in the application, either the company accepts the insurance, rejects it, or covers on limits, After the contract is issued, the insured benefits from the network of service providers contracting with his insurance company, where the insured goes to the service provider Hospital - Clinics - Doctors - Pharmacies. etc. and they request approval for the treatment. In this service, the beneficiary obtains approval or rejection of the service based on the terms of the contract.
