Finance, Risk Management & Corporate Governance Course

Ref.: 2029_268945 **Date:** 23 - 27 Dec 2024 **Location:** London (UK) **Fees:** 5200 Euro

Introduction:

This corporate governance and risk management course offers insights into the complex world of finance, risk management, and corporate governance.

The corporate governance and risk management course delves into the pivotal role that capital markets play in globalization and their significance for a well-functioning society.

Due to these markets' central and essential nature to our societies, paying close attention to their proper functioning and oversight is imperative. Thus, this corporate governance and risk management course provides a comprehensive overview of the intricate interaction between management and various corporate stakeholders.

The corporate governance and risk management course tackles the challenge of meeting these stakeholders' diverse and complex demands through efficient resource allocation over an extended timeframe, incorporating concepts such as financial risk management tools and systems, business risk in financial management, and corporate financial risk management strategies.

Targeted Groups:

- Risk and compliance managers.
- Middle managers who require a thorough understanding of governance and risk management in the public sector.
- Senior officials in national, provincial, and local government.
- Staff who support the Board or have governance responsibilities.
- In this corporate governance and risk management course, Heads of departments, directors, senior managers, managers, company secretaries, accountants, and finance professionals are responsible for governance and risk management.
- Executives, senior officials of state-owned enterprises, and listed and non-listed organizations.

Course Objectives:

By the end of this corporate governance and risk management course, participants will be able to:

- Specify the exact nature and scope of corporate financial reporting.
- Critically assess specific concepts, rules, and procedures related to corporate financial reporting.
- Comprehend the importance of working capital in today's market dynamics.
- Understand the implications of capital structure on a firm's success.
- Learn how improper capital budgeting can severely impact business outcomes.
- Identify and navigate limitations inherent in corporate financial reporting and governance.
- Manage financial risk in project management and make informed decisions.
- Enhance skills in all areas of finance and governance.
- Contribute more effectively to the finance and governance process within their organizations.
- Recognize the significance of professional development in addressing current and future challenges in finance and governance.
- Increase recognition of their learning and professional commitment by the organization.
- Engage with and navigate within a challenging learning environment.
- Integrate business plans with strategic intents.
- Thereby minimizing inter-functional conflicts.

Targeted Competencies:

By the end of this corporate governance and risk management course, the target competencies will be able to:

- Utilizing financial information to guide strategic decisions.
- Clarifying Key Performance Indicators KPIs across various functions.
- Incorporating strategic thinking and an implementation focus into professional practices.
- Critically evaluating the current state of finance, governance, and risk management practices.
- Recognizing the importance of external standards, governance requirements, and qualitative assessments.
- Identifying value creation principles as the driving force behind decision-making processes.
