Managing and Combating Security Risks and Crises Program

Ref.: 15104_281366 **Date:** 20 - 24 Oct 2024 **Location:** Cairo (Egypt) **Fees:** 3000 **Euro**

Introduction:

Security risk management is a critical process that involves identifying, analyzing, and mitigating risks to ensure the safety and stability of organizations. This security risk management techniques and strategies course will equip participants with the necessary skills and techniques for effective security risk management.

In the dynamic industrial investment environment, organizations are more susceptible than ever to myriad threats that pose significant security risks. Given intense competition and uncertainty, anticipating potential crises and disasters is crucial.

Developing a robust security risk management program necessitates meticulous planning, forming a specialized crisis and disaster management unit, and ensuring the team is well-trained to handle emergencies. A crisis can critically impact an institution both physically and morally.

Conversely, a disaster signifies an event resulting in extensive losses and may stem from natural or man-made causes. Recognizing the importance of security risk management means adopting strategies that prevent potential crises from escalating into disasters.

Targeted Groups:

- Security Managers.
- Enterprise Security Officials.
- Crisis Management Teams.
- Scenario Preparation Teams.
- Emergency Teams.
- Individuals interested in crisis management seek skill and experience development.

Course Objectives:

Upon the end of this security risk management course, participants will:

- Grasp contemporary management concepts and the challenges in the administrative environment.
- Understand factors, causes, and stages leading to crises.
- Implement security risk management techniques and control strategies.
- Address major crises and disasters with appropriate strategies and priorities.
- Comprehend escape route standards and partial and total evacuation policies during emergencies.
- Explore advanced technology for early warning and rapid control during fire outbreaks.
- Learn about environmentally friendly firefighting gases.
- Develop human and behavioral skills for crisis management teams.
- Understand the US Department of Labor's safety standards for fire control.
- Plan and respond effectively to emergencies in unique facility settings.
- Create unpredictable scenarios based on event progression.
- Apply best practices in preventative safety to effectively respond to crises and disasters.

Targeted Competencies:

By the end of this security risk management training, participants will:

- Crisis and disaster management in high-risk environments.
- Strategic planning for crisis and disaster management.
- Proficiency in crisis management.
- Leadership actions in crisis settings.
- Constructing scenarios and devising security crisis management strategies.

Course Content:
