Contract Risk Management & Compliance Training Course

Ref.: 4042_281732 **Date:** 26 - 30 Jan 2025 **Location:** Kuala Lumpur (Malaysia) **Fees:** 3900 Euro

Introduction

This contract risk management and compliance is one of the major functions of contracting, which is to ensure that risks to owners and contractors are identified and managed so that both parties are satisfied with the project outcome. While a contract cannot make risk "go away," it can identify the risks, determine who is responsible for managing each risk, and for the consequences should the risk occur.

Participants in this comprehensive contract risk management and compliance training course will learn to ensure that risks to which owners and contractors may be exposed in contracts are identified and managed so that both parties are satisfied with the project results, to identify risks, determine who is responsible for managing each risk, and the consequences if the risk occurs.

Understanding Contract Compliance and Risk Management

Contract compliance and risk management are critical components of successful contract execution. In this contract risk management and compliance course, we delve into contract risk management and explore various risk management tools and strategies, such as contract compliance training, which educates individuals on effectively adhering to and managing contracts.

Targeted Groups

- Contracts, tendering, purchasing, procurement, and project personnel.
- Contract administration, engineering, operational, and maintenance personnel.
- Risk, claims, financial, and audit personnel.
- Project management professionals.
- And all others involved in planning, evaluating, preparing, and managing tenders, specifications, awards, and contracts that cover the acquisition of materials, equipment, and services and who are in organizations whose leadership wants high levels of competency in those involved in these activities.

Course Objectives

At the end of this contract risk management and compliance course, the participants will be able to:

- Provide an understanding of how risk arises in contract risk management.
- Compare different methods of identifying and assessing risk within the contract and risk management frameworks.
- Review the impacts of different approaches to risk allocation in contract compliance management.
- Explore different contract types to transfer risks as part of advanced contract risk management.
- Consider the contractual techniques to ensure effective risk allocation using contract risk management tools.
- Review risk management techniques during the life of a contract, ensuring continuous

contract risk compliance.

Targeted Competencies

In this contract risk management and compliance course, the target competencies will be able to improve the following:

- Critical understanding of the risk mitigation process, including contract risk management processes.
- Knowledge to move contracts from the tactical to a more important strategic focus, enhancing contract compliance training and understanding.
- Ability to identify risks that can arise during contract compliance management.
- Skills in allocating contract and procurement risk, with awareness of contract management risks.
- Examples of contract terms and conditions that allocate risk and ensure contract risk and compliance.
